Re: Phase II Site Investigation Summary Letter
Office Building
340 North Avenue East
Cranford, NJ 07016
Peak Project No. 2505

Dear Mr. Mercatili:

Peak Environmental LLC (Peak) appreciates the opportunity to provide 340 North Avenue LLC (Client) with this summary report detailing the findings of the Phase II Site Investigation (Phase II) conducted at 340 North Avenue East, Cranford, NJ (Site). The objective of the Phase II was to evaluate if there were soil and/or groundwater impacts associated with historical operations at the Site.

Project Background

The 1.52-acre Site is developed with one, large three-story office building with multiple tenants.

A Phase I Environmental Site Assessment (ESA) was completed for this Site on May 23, 2019 by EBI Consulting (included as **Attachment 1**). EBI Consulting identified one recognized environmental condition (REC) associated with historic Site use. The Site was historically occupied by a chemical manufacturing tenant, as well as, multiple bronze bearing manufacturing tenants from the 1940s through the 1970s. The operations were conducted on the southern portion of the Site, which is currently an asphalt parking lot. Due to the presumed usage of metals, petroleum products and solvents, EBI Consulting recommended further investigation and considered the historic Site use to be a REC and potential vapor concern.

As per EBI Consulting's recommendations, Peak conducted a Phase II Site Investigation on the southern portion of the Site. The findings are discussed below.

Site Investigation and Results

On June 26, 2019, Peak was onsite with Environmental Probing Investigations, Inc (EPI), to conduct a geophysical survey with ground penetrating radar (GPR) and line tracing to confirm that no utilities were present at boring locations. The geophysical survey did not identify any utilities present at or surrounding the boring locations.

Following the clearance of boring locations, EPI and Peak advanced four soil borings (SB-1 to SB-4) on the southern portion of the Site (**Drawing 1** presents the location of the borings). The borings were advanced with a truck-mounted drill rig, which utilized a direct push method to advance the borings to 5-feet below

grade (bg). Soil borings were screened with a photoionization detector (PID) and visually inspected for contamination. No PID readings were detected in the soil borings.

The soils observed in all borings were predominantly brown coarse, medium, fine sands, with some clay and silt. Peak also noted non-native fill material consisting of brick, wood pieces and possible coal observed in all four borings from depths of 0.5 to 4-feet bg. Possible staining was observed in SB-1 from approximately 2-4-feet bg and in SB-2 from 0.5-4-feet bg, with more significant staining observed at 3.5-4 feet bg at SB-2. Boring logs are included as **Attachment 2**.

Based on the findings onsite, the installation of a temporary monitoring well point was determined to be unnecessary due to the absence of staining below 4-feet bg and the absence of groundwater in the soil borings.

The following samples were collected:

- SS-1 (from SB-1) - depth 3.5-4-feet bg (collected in stained area, soil was black/stained from 0.5-4-feet bg)
- SS-2 (from SB-2) - depth 3.5-4 feet bg (collected in stained area, soil was black/stained from 0.5-4 feet bg)
- SS-4 HF (from SB-4) - depth 1-1.5 feet bg (small pieces of brick and wood, which may be indicative of historic fill material)

A sample was not collected from soil boring SB-3 since staining was not evident in the boring and a sample of non-native fill material was collected from SB-4. All samples were submitted to the laboratory; however, analysis was on hold. Peak authorized SS-1 and SS-2 to be analyzed for extractable petroleum hydrocarbons category 2 (EPH Cat. 2) with contingent analysis of volatile organic compounds (VOCs) and target analyte list (TAL) metals.

EPH Cat. 2 was not detected in SS-1 or SS-2; therefore, contingent analysis was not necessary. SS-4 was not analyzed since an investigation of potential historic fill material is not warranted at this time as redevelopment is not proposed and the Site is not in the New Jersey Department of Environmental Protection's (NJDEP's) Site Remediation Program.

Upon completion, the soil borings were backfilled and patched with asphalt to match surrounding conditions. The samples were collected in laboratory-supplied sample vials and stored in a cooler at or under four degrees Celsius. The samples were sent to Aqua Pro-Tech Laboratories (APL, NJDEP Certified Lab # 107010) under chain-of-custody for laboratory analysis.

Soil analytical results are summarized in **Table 1** and the APL Laboratory Report is included as **Attachment 3.**

Conclusions and Recommendations

Based on the 2019 Phase I ESA prepared by EBI Consulting, Peak conducted a soil investigation to evaluate if contamination associated with historical operations is present onsite. As indicated by Peak's Phase II investigation, EPH Cat. 2 was not detected in soil samples SS-1 or SS-2. Based on the absence of contamination, Peak recommends no further investigation. However, if future construction occurs at the Site where the subsurface will be disturbed, additional investigation of the fill material will be warranted.

We appreciate the opportunity to provide you with professional services and trust the foregoing information is suitable to meet your needs. We remain available to discuss any aspect of this project.

Sincerely,
Peak Environmental LLC

Carrie Berry

Subject: **Phase I Environmental Site Assessment, 340 NAE, LLC**
340 North Avenue East, Cranford, New Jersey 07016
EBI Project # 1119002709

Dear Ms. Cespedes:

Attached please find *EBI's Phase I Environmental Site Assessment*, (the *Report*) for the above-mentioned asset (the Subject Property). During the property survey and research, *EBI's* property surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the property and its history. The *Report* was completed according to the terms and conditions authorized by you, the Client. This *Report* has been completed in general conformance with ASTM E 1527–13 and *Columbia Bank's* Scope of Work.

This *Report* is prepared for, addressed to and may be relied upon by *Columbia Bank,* and their respective successors and assigns.

Reliance on the *Report* and the information contained herein shall mean; (i) the *Report* may be relied upon by *Columbia Bank* and their respective successors and assigns in determining whether to make a loan or loans evidenced by a note or notes secured by the property or a pledge of equity interests in the borrower (the "Loan"); (ii) the *Report* may be relied upon by any potential purchaser, successor or assignee of any of the Loans or an interest therein in determining whether to purchase the Loan from *Columbia Bank* or an interest in the Loan or Loans or securities backed or secured by same, and any rating agency rating securities representing an interest in the Loan or backed or secured by the Loan; (iii) the *Report* may be referred to in and included, in whole or in part, with materials offering for sale the Loan or an interest in the Loan or securities backed or secured by the Loan; (iv) the *Report* speaks only as of its date in the absence of a specific written update of the *Report* signed and delivered by *EBI Consulting.*

There are no intended or unintended third party beneficiaries to this report, except as expressly stated herein.

EBI Consulting is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the *Report* or on the closing of any business transaction.

EBI Consulting declares that, to the best of our professional knowledge and belief, *EBI* meets the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and *EBI* has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. *EBI Consulting* has developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you for the opportunity to prepare this *Report,* and assist you with this project. Please call us if you have any questions or if *EBI Consulting* may be of further assistance.

Respectfully Submitted,
EBI CONSULTING

EXECUTIVE SUMMARY

At the request of Columbia Bank, EBI has performed a Phase I Environmental Site Assessment (ESA) of the property located at 340 North Avenue East in Cranford, New Jersey 07016, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions* in connection with the Subject Property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-13.

The Subject Property includes one irregular-shaped parcel, totaling approximately 1.52 acre. The Subject Property is currently improved with a three-story multi-tenant office building occupied by eight office tenants. No vacant tenant spaces were identified at the time of assessment. There is no basement present beneath the existing structure. The existing improvements were reportedly constructed in 1985.

At the time of assessment, there were no manufacturing or industrial operations conducted at the Subject Property.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. EBI's Findings and Opinions are presented in Section 8.0, and recommendations for further action or investigation are presented in Section 9.0.

1.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) of the property located at 340 North Avenue East in Cranford, New Jersey 07016.

1.1 PURPOSE

The purpose of this ESA was to identify *recognized environmental conditions* and certain environmental conditions outside the scope of ASTM Practice E 1527-13 in connection with the property at the time of the property reconnaissance.

1.2 SCOPE-OF-SERVICES

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review.

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water, and radon.

1.3 ASSUMPTIONS, LIMITATIONS AND EXCEPTIONS

This Phase I Environmental Site Assessment (the report) has been prepared for the use of Columbia Bank, in accordance with our Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services approved and signed by Columbia Bank (the Agreement), and with the limitations described below, all of which are integral parts of this report. A copy of the signed Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services is maintained at the EBI Consulting office in Burlington, Massachusetts. To the extent any provisions of this report conflict with the terms of the Agreement, the Agreement will control.

EBI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of *ASTM Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This report was prepared with no exceptions or deletions from ASTM Standard E 1527-13.

This Phase I Environmental Site Assessment has been prepared to assess a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit *Columbia Bank* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice" as defined in 42 U.S.C. § 9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to a release to the environment, (2) under conditions that indicate an existing release or a past release, or (3) under conditions that pose a material threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term does not include *de minimis conditions* that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in the report are based on our visual observations in the field, the standard environmental record sources and municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents and drawings. EBI relies completely on the information, whether written, graphic, or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct unless the information is known to be inaccurate or if it is obvious, based on other information obtained as part of the assessment, that the information is not accurate. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to verify independently the accuracy or completeness of all information reviewed or received during the course of these environmental services.

The information reported, as well as EBI's findings, conclusions, and recommendations are based upon sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with authorities having jurisdiction over the Subject Property. *Columbia Bank*

agrees that EBI has no obligation to independently verify the accuracy or completeness of the information reviewed or received during the course of these environmental services.

EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under un-surveyed and/or inaccessible portions of the Subject Property. Unsurveyed and inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under the Subject Property where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

EBI services and opinions are based on the scientific or technical tests or procedures specifically set forth in the scope of the Services described in this report. The ASTM Standard E 1527-13 does not encompass analytical testing to evaluate asbestos containing materials, radon, lead-based paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI used that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality at the same time and under similar circumstances. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The report speaks only as of its date, in the absence of a specific written update of the report, signed and delivered by EBI. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect or consequential damages whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever. EBI will only be liable for actual damages resulting from EBI's negligence, errors, or omissions and EBI's liability will be in accordance with the terms and conditions of the Agreement to complete this report.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions.

1.4 SPECIAL TERMS AND CONDITIONS

This Phase I Environmental Site Assessment (the report) has been prepared to assist Columbia Bank in its underwriting of a proposed mortgage loan on the Subject Property. This report can be relied upon by only the parties stated in the transmittal letter at the front of this report. EBI's liability to a purchaser wishing to use this report is limited to the cost of the report. Amendments to EBI's limitations as stated herein that may occur after issuance of the report are considered to be included in this report. Payment for the report is made by, and EBI's contract and report extends to Columbia Bank only, in accordance with our Standard Conditions For Engagement and, Authorization Letter and Agreement for Environmental Services.

This *Report* is prepared for, addressed to and may be relied upon by *Columbia Bank,* and their respective successors and assigns.

Reliance on the *Report* and the information contained herein shall mean; (i) the *Report* may be relied upon by *Columbia Bank* and their respective successors and assigns in determining whether to make a

loan or loans evidenced by a note or notes secured by the property or a pledge of equity interests in the borrower (the "Loan"); (ii) the *Report* may be relied upon by any potential purchaser, successor or assignee of any of the Loans or an interest therein in determining whether to purchase the Loan from *Columbia Bank* or an interest in the Loan or Loans or securities backed or secured by same, and any rating agency rating securities representing an interest in the Loan or backed or secured by the Loan; (iii) the *Report* may be referred to in and included, in whole or in part, with materials offering for sale the Loan or an interest in the Loan or securities backed or secured by the Loan; (iv) the *Report* speaks only as of its date in the absence of a specific written update of the *Report* signed and delivered by *EBI Consulting*.

1.5 DATA GAPS

Any data gaps identified herein, as defined by ASTM Practice E 1527-13 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report. It should be noted that at the time this report was issued EBI had not received responses to requests for information from the Union County Health Department, the Cranford Township Clerk and the New Jersey Department of Environmental Protection. However, based on the historical information obtained through other sources, this data gap is not considered to have significantly impacted the ability to identify recognized environmental conditions and does not alter the conclusions of this report.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 OWNERSHIP AND LOCATION

According to the Cranford Assessor's Office, the Subject Property is currently owned by Northside Realty LLC.

The Subject Property is located at 340 North Avenue East in Cranford, Union County, New Jersey. The Subject Property includes one irregular-shaped parcel, identified by the Cranford Assessor's Office as Block 317, Lot 19.01, totaling approximately 1.52 acre. The Subject Property is located in the southwest quadrant of the intersection of North Avenue East and John Street. Figure 1 - Location Map depicts the location of the Subject Property on a street map of Cranford, New Jersey. Figure 2 - Locus Map depicts the location of the Subject Property on the Roselle, NJ United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle. Figure 3 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

2.2 SUBJECT PROPERTY IMPROVEMENTS

The Subject Property is currently improved with a three-story multi-tenant office building. There is no basement present beneath the existing structure. The existing improvements were reportedly constructed in 1985.

The existing building is located on the central portion of the property. Areas of the Subject Property surrounding the existing building include asphalt parking areas, concrete walkways, and landscaped portions.

2.3 CURRENT USE OF THE SUBJECT PROPERTY

At the time of assessment, the Subject Property was occupied by eight office tenants. No vacant tenant spaces were identified at the time of assessment. There are currently no manufacturing or industrial operations conducted at the Subject Property. The current tenants and associated operations are summarized in the table below.

CURRENT OCCUPANTS AND OPERATIONS			
Occupant	**Location**	**Operations**	**Notable Hazardous Substances / Petroleum Products Identified**
Eight (8) Office Tenants	340 North Avenue East	Office space	No

Please refer to Section 5.2 for further discussion regarding hazardous substances and petroleum products at the Subject Property.

2.4 MUNICIPAL SERVICES & UTILITIES

The Subject Property is serviced by the following municipal services and utilities:

MUNICIPAL SERVICES AND UTILITIES	
Utility	**Provider/Source**
Potable Water Supply	New Jersey American Water
Sewage Disposal System	Township of Cranford

MUNICIPAL SERVICES AND UTILITIES	
Utility	**Provider/Source**
Electrical Service	PSE&G
Natural Gas Service	Elizabethtown Gas
Oil Service	Not applicable
Heating/Cooling Systems	Rooftop-mounted electric / natural gas HVAC units
Emergency Power	Not applicable

2.5 ADJOINING PROPERTIES

Property use in the vicinity of the Subject Property is primarily characterized by residential and retail/commercial development, as well as railroad tracks.

ADJOINING PROPERTIES	
North	The Subject Property is bound to the north by North Avenue East, beyond which are located three residences (20, 21, and 22 John Street).
South	The Subject Property is bound to the south by railroad tracks, beyond which are located a residential apartment community (555 South Avenue East) and Cube Smart Self–Storage (601 South Avenue East).
East	The Subject Property is bound to the east by Pearl Insurance Agency (348 North Avenue East), a residence (350 North Avenue East), an office building (354 North Avenue East), Reynolds Plumbing (358 North Avenue East), and Cranford Florist (362 North Avenue East).
West	The Subject Property is bound to the west by two residences (334 and 336 North Avenue East), T&J Lawnmower Service (332 North Avenue East), and Cranford Board of Education garage property (324 North Avenue East).

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties. However, the following properties were identified on the regulatory database report discussed in Section 4.1:

- 555 South Avenue is one of the southerly adjacent properties and was identified on the database as a SHWS and VCP site.
- 360 North Avenue East is one of the easterly adjacent properties and was identified on the database as a UST site.
- 324 North Avenue is one of the westerly adjacent properties and was identified on the database as a SHWS, LUST, and UST site.

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by Columbia Bank with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated Client contact. The User Questionnaire has not been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. Relevant documentation referenced below is presented in Appendix C.

3.1 TITLE RECORDS

Title record information associated with the Subject Property has not been provided to EBI by Columbia Bank. A detailed discussion regarding review of information obtained from other sources is presented in Section 4.3.5 of this report.

3.2 ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

Columbia Bank provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property. A discussion regarding environmental liens is presented in Section 4.3.7 of this report. A detailed discussion regarding activity and use limitations is presented in Sections 4.1.1 and 4.1.2 of this report.

3.3 SPECIALIZED KNOWLEDGE

Columbia Bank provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. EBI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.3.8 of this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Columbia Bank provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Columbia Bank provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Columbia Bank provided contact information for the Subject Property owner, manager and/or occupants.

3.7 REASON FOR PERFORMING PHASE I ESA

Columbia Bank retained EBI to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORDS

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is presented in Appendix E.

The database report identified 38 "orphan" sites. Orphan sites are those sites that could not be accurately mapped or geocoded due to inadequate location information. EBI attempted to locate these sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, EBI did not identify listed orphan sites within the approximate minimum search distances that may be considered likely to have impacted conditions at the Subject Property.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	**Approximate Minimum Search Distance**	**Subject Property Listed**	**Off-site Listings Within Search Distance**
Federal NPL Sites	1.0 mile	No	0
Federal Delisted NPL Sites	0.5 mile	No	0
Federal SEMS Sites	0.5 mile	No	0
Federal SEMS-ARCHIVE Sites	0.5 mile	No	0
Federal RCRA CORRACTS Sites	1.0 mile	No	**1**
Federal RCRA non-CORRACTS TSD Sites	0.5 mile	No	0
Federal RCRA Generators Sites	Property & Adjoining	No	0
Federal Engineering / Institutional Control Sites	0.5 mile	No	0
Federal ERNS Sites	Property	No	NA
State and Tribal equivalent NPL / CERCLIS Sites	1.0 / 0.5 mile	No	**467**
State and Tribal Spills Sites	Property	No	NA
State and Tribal Landfill or Solid Waste Disposal Sites	0.5 mile	No	0
State and Tribal Leaking Storage Tank Sites	0.5 mile	No	**34**
State and Tribal Registered Storage Tank Sites	Property & Adjoining	No	**2**
State and Tribal Engineering / Institutional Control Sites	0.5 mile	No	**5**
State and Tribal Voluntary Cleanup Sites	0.5 mile	No	**25**
State and Tribal Brownfield Sites	0.5 mile	No	**9**
NJ Release	Property	**Yes**	NA

4.1.1 Federal Agency Database Records

National Priority List (NPL)
The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the NPL.

Delisted National Priority List (NPL)
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the Delisted NPL database.

Superfund Enterprise Management System (SEMS)
SEMS tracks federal hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of the USEPA's Superfund Program. The list was formerly known as CERCLIS and was renamed at the end of 2015. The list contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). SEMS also contains sites that are either proposed to or on the National Priority List (NPL), as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SEMS database.

SEMS – ARCHIVE
SEMS-ARCHIVE tracks sites that have been removed from the SEMS list. This list was formerly known as the CERCLIS- NFRAP list and was renamed SEMS-Archive at the end of 2015. SEMS-ARCHIVE sites may be sites where, following an initial investigation, no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SEMS-ARCHIVE database.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. The Subject Property was not identified on the RCRA CORRACTS database. However, one site located within 1.0 mile of the Subject Property was identified on the RCRA CORRACTS database. The listed site is located 0.658 mile from the Subject Property. Based upon the distance from to the Subject Property, it is considered unlikely that conditions associated with the identified RCRA-CORRACTS facility represent an environmental concern to the Subject Property.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities
RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the

RCRA non-CORRACTS TSD database.

RCRA Hazardous Waste Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month. Neither the Subject Property nor any adjoining properties were identified on the RCRA Generator database.

Federal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on Federal Engineering Control or Institutional Control Registries.

Emergency Response Notification System (ERNS)

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

4.1.2 State and Tribal Agency Database Records

State and Tribal equivalent NPL Sites and CERCLIS Sites

State and tribal equivalent NPL and CERCLIS databases were searched for sites located within 1.0 mile and 0.5 mile of the Subject Property, respectively. The Subject Property was not identified on state and/or tribal equivalent NPL and CERCLIS databases. However, 467 sites located within the specified minimum search distances were identified on state and/or tribal equivalent NPL and CERCLIS databases. Of the 467 sites listed, 454 sites are listed at least 0.125 mile from the Subject Property and based on distance are not expected to represent a concern. Of the 13 sites remaining, nine have obtained regulatory closure and are not adjacent to the Subject Property, and based on their distance and/or regulatory status are not expected to represent a concern. Information regarding the one adjacent listing and three active listings is presented in the following table:

STATE AND TRIBAL EQUIVALENT NPL SITES AND CERCLIS SITES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**

STATE AND TRIBAL EQUIVALENT NPL SITES AND CERCLIS SITES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
555 South Avenue Cranford, NJ	Adjacent / South / Upgradient	PI No. G000029241	Site ID: 69268 Home Owner: No MOA Date: 12/31/2003 Status: Closed (RAO-E Restricted Use) Date of Closure: 02/14/2017 LSRP: Laura Brinkerhoff LSRP Phone: (732) 223-2225
Cranford Board of Education 324 North Avenue Cranford, NJ	Adjacent / West / Downgradient	PI No. 009547	Site ID:46703 Bureau: BUST Home Owner: No Status: Closed (NFA-A Unrestricted Use) Date of Closure: 09/26/1994
Cranford Business Park Building 570 South Avenue Cranford, NJ	0.08 mile / Southeast / Upgradient	PI No. 007667	Site ID: 43916 Home Owner: No Status: Active Media Impacted: Soils Only Case Status Date: 05/08/2012
Ell Inc. 530 South Avenue East Cranford, NJ	0.12 mile / Southwest / Downgradient	PI No. 005292	Site ID: 43314 Home Owner: No Media Impacted: GW Status: LSRP Oversight Status Date: 03/20/2013

* Presumed hydrogeologic gradient based upon regional topography

555 South Avenue is adjacent to the south, at least 130 feet away across the adjoining railroad tracks. This site was identified on the database as a SHWS and VCP site. The site has been granted a Restricted Use RAO dated February 14, 2017. Brinkerhoff Environmental Services is listed as the LSRP. EBI contacted Brinkerhoff to obtain additional information regarding this adjacent site. According to Ms. Amber Satterly, Senior Project Manager with Brinkerhoff, groundwater was not impacted at this property and therefore this site doesn't pose a concern to the Subject Property. No additional action or investigation regarding this listing is recommended.

With regard to the remaining listings, based upon the current regulatory status, distance/presumed hydrogeologic gradient relative to the Subject Property, and/or reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified sites represent an environmental concern to the Subject Property.

State and Tribal Spills Sites (Spills)

A review of available Spills databases was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the Spills database.

State and Tribal Landfill Sites and Solid Waste Disposal Sites

The state and tribal landfill and solid waste disposal site databases identify active or inactive landfill and transfer station facilities, as well as open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on state or tribal landfill and solid waste disposal site databases.

State and Tribal Leaking Storage Tank Sites

Leaking Storage Tank Sites are properties where releases of hazardous substances or petroleum products from underground storage tanks (USTs) and/or aboveground storage tanks (ASTs) have been identified and reported to state, tribal, or local agencies. The Subject Property was not identified on state or tribal Leaking Storage Tank databases. However, 34 sites located within 0.5 mile of the Subject Property were identified on state or tribal Leaking Storage Tank databases. Of the 34 sites listed, 27 are located at least 0.125 mile from the Subject Property and based on their distance are not expected to represent a concern to the Subject Property. Information regarding the seven remaining listed sites is presented in the following table:

STATE AND TRIBAL LEAKING STORAGE TANK SITES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Cranford Board of Education Garage 324 North Avenue East Cranford, NJ	Adjacent / West / Downgradient	NJDEP Case No. 90-05-03-1356	Database: HIST LUST UST No. 0095475 Status: Closed (NFA Issued) Date of Closure: 09/24/1994
Ell Inc. 530 South Avenue East Cranford, NJ	0.12 mile / Southwest / Downgradient	PI No. 005292	Database: NJ LUST Activity No. LSR130001 Media Impacted: GW Status: LSRP Oversight Status Date: 03/20/2013
Sunoco 0007-0078 401 North Avenue Cranford, NJ	0.11 mile / East-northeast / Downgradient	PI No. 014557	Database: NJ LUST Activity No. LSR10001 Status: Active (LSRP Oversight) Status Date: 03/26/2011
Electric Insulation Inc. 530 South Avenue East Cranford, NJ	0.12 mile / Southwest / Downgradient	NJDEP Case No. 91-11-15-1349	Database: HIST LUST UST ID 0052922 Status: Case Awaiting Assignment
Shell Service Station 345 North Avenue & Elizabeth Street Cranford, NJ	0.06 mile / Northeast / Downgradient	NJDEP Case No. 90-02-27-0831	Database: HIST LUST Media Impacted: Soil & GW Status: Closed (Limited Restricted Use) Date of Closure: 11/25/2013
Department of Public Works 364 North Avenue East Cranford, NJ	0.07 mile / East-northeast / Downgradient	NJDEP Case No. 93-11-03-1434	Database: HIST LUST Status: Closed Date of Closure: 10/28/1994
Sunoco S/S 0007-0078 401 North Avenue East Cranford, NJ	0.11 mile / East-northeast / Downgradient	NJDEP Case No. 91-09-20-1206	Database: HIST LUST UST No. 0145578 Media Impacted: Soil & GW Status: Assigned to Program

* Presumed hydrogeologic gradient based upon regional topography

324 North Avenue East is one of the westerly adjacent properties and was identified on the database as a LUST site. According to the database and information obtained via the NJDEP Dataminer website, this case was granted regulatory closure in the form of an Unrestricted Use NFA, dated September 26, 1994. Based on the current regulatory status, presumed hydrogeologic gradient, distance to the Subject Property building's foundation, and on the fact that the release pertained to a petroleum product (gasoline), it is considered unlikely that conditions associated with this listing represent an environmental concern.

With regard to the remaining listings, based upon the current regulatory status, distance/presumed hydrogeologic gradient relative to the Subject Property, and/or reported nature/extent of

contamination, it is considered unlikely that conditions associated with the identified Leaking Storage Tank sites represent an environmental concern to the Subject Property.

State and Tribal Registered Storage Tanks

The Subject Property was not identified on state or tribal Registered Storage Tank databases. However, two adjoining properties were identified on state or tribal Registered Storage Tank databases. Information regarding the listed sites is presented in the following table:

STATE AND TRIBAL REGISTERED STORAGE TANKS				
Location	**Distance / Direction / Gradient**	**Capacity / Contents**	**Year Installed**	**Status**
Cranford Board of Education 324 North Avenue East Cranford, NJ	Adjacent / West / Downgradient	(1) UST (Size Not Specified) / Leaded Gasoline	1987	Removed (1993)
Miclor Enterprises 360 North Avenue East Cranford, NJ	Adjacent / East / Crossgradient	(2) 500- gallon USTs / Leaded Gasoline	1944	Removed (2013)

* Presumed hydrogeologic gradient based upon regional topography

324 North Avenue East was discussed previously in the LUST section.

With regard to the 360 North Avenue East listing, based upon the absence of reported releases, it is considered unlikely that conditions associated with the identified state or tribal Registered Storage Tank site represent an environmental concern to the Subject Property.

State and Tribal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. The Subject Property was not identified on state or tribal Engineering Control or Institutional Control Registries. However, five sites located within 0.5 mile of the Subject Property were identified on state or tribal Engineering Control or Institutional Control Registries. Of the five sites listed, two are located at least 0.293 mile from the Subject Property and based on distance are not expected to represent a concern. Information regarding the three remaining listed sites is presented in the following table:

STATE AND TRIBAL ENGINEERING CONTROL / INSTITUTIONAL CONTROL REGISTRIES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Cranford Business Park Building 570 South Avenue Cranford, NJ	0.08 mile / Southeast / Upgradient	PI No 007667	Site ID 43916 DER Filed Date: 08/20/1997 Contaminants: Aldrin, DDD, DDE, DDT, Dieldrin Description: 9% of Site Restricted
Shell Service Station 138325 345 North Avenue Cranford, NJ	0.06 mile / Northeast / Downgradient	PI No. 004726	Site ID 1268 Date Established: 08/28/2003 Contaminants: Benzene, MTBE, Synthetic Organic Chemicals, TBA

STATE AND TRIBAL ENGINEERING CONTROL / INSTITUTIONAL CONTROL REGISTRIES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Sunoco Retail 401 North Avenue Cranford, NJ	0.11 mile / East-northeast / Downgradient	PI No. 014557	Site ID 1267 Date Established: 04/09/2015 Contaminants: Benzene, Synthetic Organic Chemicals

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, distance/presumed hydrogeologic gradient relative to the Subject Property, and/or reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified sites represent an environmental concern to the Subject Property.

State and Tribal Voluntary Cleanup Sites

The Subject Property was not identified on state or tribal Voluntary Cleanup Site databases. However, 25 sites located within 0.5 mile of the Subject Property were identified on state or tribal Voluntary Cleanup Site databases. Of the 25 sites listed, 21 are located at least 0.146 mile from the Subject Property and are not expected to represent a concern. Information regarding the four remaining listed sites is presented in the following table:

STATE AND TRIBAL VOLUNTARY CLEANUP SITES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
555 South Avenue Cranford, NJ	Adjacent / South / Upgradient	Case No. 96-06-24-1038-53	Type of VCP File: Historical MOA Execution Date: 12/31/2003 Case Contact: Stone Street Asset Mgmt.
		Case No. 96-06-24-1038-53B	Type of VCP File: Historical MOA Execution Date: 10/13/2000 Case Contact: The Randi B.
555 South Avenue Cranford, NJ	Adjacent / South / Upgradient	Case No. 96-06-24-1038-53A	Type of VCP File: Historical MOA Execution Date: 07/26/1996 Case Contact: First Nation
33 John Street Cranford, NJ	0.07 mile / North-northwest / Downgradient	Case No. 05-04-26-1203-40	Type of VCP File: Historical MOA Execution Date: 02/27/2006 Case Contact: Not Reported
43 John Street Cranford, NJ	0.10 mile / North-northwest / Downgradient	Case No. 04-10-04-1201-26	Type of VCP File: Historical MOA Execution Date: 03/31/2005 Case Contact: Not Reported

* Presumed hydrogeologic gradient based upon regional topography

555 South Avenue was previously discussed in the SHWS section.

With regard to the remaining listings, based upon the current regulatory status, distance/presumed hydrogeologic gradient relative to the Subject Property, and/or reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified Voluntary Cleanup Sites represent an environmental concern to the Subject Property.

State and Tribal Brownfield Sites

The Subject Property was not identified on state or tribal Brownfield Sites databases. However, nine sites located within 0.5 mile of the Subject Property were identified on state or tribal Brownfield Sites

databases. Of the nine sites listed, seven are located at least 0.164 mile from the Subject Property and based on distance are not expected to represent a concern. Information regarding the two remaining listed sites is presented in the following table:

STATE AND TRIBAL BROWNFIELD SITES			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
American Home Products 570 South Avenue Cranford, NJ	0.08 mile / Southeast / Upgradient	PI No. 007667	Ownership: NJDEP Case Owner Organization: Manor Management Remediation in Progress: Yes Assigned to Program: 05/31/1994
American Home Products 570 South Avenue Cranford, NJ	0.08 mile / Southeast / Upgradient	PI No. 007667	Ownership: Corporation Owner Organization: 585 Prospect, LLC Remediation in Progress: Unknown Assigned to Program: Not Reported

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, it is considered unlikely that conditions associated with the identified Brownfield Sites represent an environmental concern to the Subject Property.

Additional Environmental Records

The Subject Property address was listed on the NJ Release database. Details are as follows:

- 340 North Avenue East was identified on the database as a NJ Release site (NJDEP Case No. 0209-04-1703-26). According to the database, the listing pertains to a September 4, 2002 incident. The police and fire department were reportedly present during this incident. Additional details were not provided on the database. Mr. Ron Abram, the Subject Property's Maintenance Supervisor since 1987, stated that this listing likely pertains to an incident in which an HVAC compressor on the roof malfunctioned and Freon leaked onto the building's roof. EBI sent a request to the NJDEP in order to obtain additional information regarding this incident. Based on information provided to EBI by Mr. Ron Abram, this listing is unlikely to represent a concern.

4.1.3 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the following: the New Jersey Department of Environmental Protection (NJDEP); Union County Health Department; and the Cranford Township Clerk.

New Jersey Department of Environmental Protection (NJDEP)

EBI submitted a written request to the New Jersey Department of Environmental Protection (NJDEP) for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property, in accordance with the Freedom of Information Act (FOIA). As of the date of this report, EBI has not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material effect on the findings of this report, EBI will forward this information as an addendum to this report. If no response is received, or no material information is identified, our report will not be modified.

Union County Health Department

EBI submitted a written request to the Union County Health Department for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property, in accordance with the Freedom of

Information Act (FOIA). As of the date of this report, EBI had not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material effect on the findings of this report, EBI will forward this information as an addendum to this report. If no response is received, or no material information is identified, our report will not be modified.

Cranford Township Clerk
EBI submitted a written request to the Cranford Township Clerk for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property, in accordance with the Freedom of Information Act (FOIA). As of the date of this report, EBI had not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material effect on the findings of this report, EBI will forward this information as an addendum to this report. If no response is received, or no material information is identified, our report will not be modified.

4.1.4 Vapor Migration

EBI conducted a vapor migration screening survey of the Subject Property. This vapor migration screening was conducted in accordance with ASTM E1527-13 and is not intended to satisfy the requirements of ASTM E2600-15. The scope of this screening was limited to visual observations and review of the environmental database report and did not include the collection and laboratory analysis of air samples to confirm or refute the presence of airborne contaminants by vapor intrusion.

EBI's site observations and review of the environmental database report (cited in Section 4.1) did not identify any conditions on the Subject Property or on adjoining properties that would indicate a REC relative to vapor migration at the Subject Property, with the exception of the following:

- According to historic resources, the Subject Property was formerly occupied by a chemical manufacturing company and multiple bronze bearing manufacturing companies. The operations spanned from approximately the 1940s through the 1970s. These former chemical manufacturing and bearing manufacturing operations existed primarily in the Subject property's southern portion, which is currently an asphalt parking lot. Based on the nature of these operations, including the presumed use of metals, petroleum products and solvents, these historic operations are considered a recognized environmental condition (REC) and a potential vapor concern.

4.2 PHYSICAL SETTING

4.2.1 Topography

The Subject Property is located at an elevation of approximately 86 feet above mean sea level (msl). The topography of the Subject Property is relatively flat and slopes gently to the north-northwest. The Subject Property is located in a relatively flat area, and the general slope of the surrounding region is to the north-northwest (see Figure 2 - Locus Map, which depicts the location of the Subject Property on the Roselle, NJ USGS 7.5 Minute Topographic Quadrangle).

4.2.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Information concerning the geology of the Subject Property was obtained from the USGS Ground Water Atlas of the United States, New Jersey region (1997). The Subject Property is located within the Piedmont physiographic province, which consists of an area of varied topography that ranges from lowlands to peaks and ridges of

moderate altitude and relief. The metamorphic and igneous rocks of this province range in age from Precambrian to Paleozoic and have been sheared, fractured, and folded.

The Subject Property is further located along the Fall Line, which is the border between the Piedmont and Coastal Plains physiographic provinces. This region is characterized by a zone of rapids or waterfalls that marks the position where streams flow from the consolidated and erosion-resistant metamorphic rocks of the Piedmont physiographic province onto the soft semi-consolidated to unconsolidated sedimentary deposits of the Coastal Plains physiographic province. The increase in stream gradient at the Fall Line provided favorable locations for mills and other installations that harnessed waterpower during the early years of the Industrial Revolution, and on most major rivers, the Fall Line coincides with the head of navigation.

According to the Environmental Data Resources, Inc. (EDR) GeoCheck Physical Setting Source Summary, the dominant soil composition in the vicinity of the Subject Property is classified as urban land and is characterized by a non-homogeneous distribution of soil and fill types. Excavation and backfilling for building foundations, utility conduits, and other construction results in a varied subsurface profile. In this setting, estimation of local subsurface parameters such as permeability, moisture content, and organic fraction is not feasible without site-specific testing data.

4.2.3 Hydrogeology and Hydrology

No natural surface water bodies were identified on or adjacent to the Subject Property. The nearest downgradient surface water body is the Rahway River, located approximately 2,500 feet northwest of the Subject Property.

Local groundwater gradient is expected to follow surface topography; therefore, groundwater flow near the Subject Property is expected to flow to the north-northwest. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

Local groundwater gradient is typically expected to follow surface topography; however, the absence of a distinct ground surface slope at the Subject Property prevents estimation of groundwater flow direction by this method.

4.3 HISTORICAL USE OF THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

EBI attempted to determine the history of the Subject Property dating back to 1940 or first developed use. The following table summarizes the historical use of the Subject Property and surrounding area.

HISTORICAL USE SUMMARY			
Period	**Historical Uses**		**Source(s)**
	Subject Property	**Surrounding Area**	
At least 1915 to 1948	One small residence, one planing mill, a sawmill, a lumberyard, and cement storage areas.	Residences, a lumberyard, stores, railroad tracks, vacant land.	Aerial Photographs Fire Insurance Maps Topographic Maps City Directories Municipal Records Personal Interviews Other Historical Records

HISTORICAL USE SUMMARY			
Period	**Historical Uses**		**Source(s)**
	Subject Property	**Surrounding Area**	
1949 to 1963	One residence, a chemical manufacturing company, and a bronze bearing manufacturing company (comprised of a machine shop, storage buildings, and a foundry).	Residences, offices, railroad tracks, a coal yard, storage buildings, a gas station (to the south beyond the railroad tracks), an electric motor repair shop, and Union County Mosquito Commission.	
1964 to 1969	A chemical company, a small office building, and two to three additional commercial buildings.	Residences, offices, railroad tracks, and stores.	
1970 to 1984	A small office building, a vacant building, and two to three additional commercial buildings.	Residences, offices, railroad tracks, and stores.	
1985 to Present	Existing three-story commercial office building and associated asphalt parking areas.	Residences, a lawnmower repair shop, stores, and railroad tracks.	

No environmentally significant conditions were identified on the Subject Property or surrounding properties during the historical review, except for the following:

- According to historic resources, the Subject Property was formerly occupied by a chemical manufacturing company and multiple bronze bearing manufacturing companies. The operations spanned from approximately the 1940s through the 1970s. These former chemical manufacturing and bearing manufacturing operations existed primarily in the Subject property's southern portion, which is currently an asphalt parking lot. Based on the nature of these operations, including the presumed use of metals, petroleum products, and solvents, these historical operations are considered a recognized environmental condition (REC) and a potential vapor concern.

4.3.1 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table. Copies of selected aerial photographs are presented in Appendix F.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Issues Noted**	**Observations**
1931, 1940, 1951, 1954, 1961, 1966, 1970, 1974, 1984	No	**Subject Property:** The Subject Property appears to be occupied by three to four buildings situated throughout the lot.
		Surrounding Properties: Surrounding properties appear to be fully urbanized and are occupied by single-story and multi-story residential and commercial buildings in all directions. Additionally, railroad tracks are depicted to the south.
1991, 1995, 2006, 2010, 2013, 2017	No	**Subject Property:** The Subject Property appears to be occupied by the existing commercial building and associated parking areas.
		Surrounding Properties: Surrounding properties appear to be fully urbanized and are occupied by single-story and multi-story residential and commercial buildings in

AERIAL PHOTOGRAPH SUMMARY		
Year	**Issues Noted**	**Observations**
		all directions. Additionally, railroad tracks are depicted to the south.

4.3.2 Fire Insurance Maps

A search for historical fire insurance maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical fire insurance maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of selected fire insurance maps are presented in Appendix F.

FIRE INSURANCE MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1915	No	**Subject Property:** The Subject Property is occupied by a small residence, one planing mill, and a lumberyard.
		Surrounding Properties: Features on surrounding properties included residences to the north and east; railroad tracks to the south; and residences and a vacant lot to the west.
1922	No	**Subject Property:** The Subject Property is occupied by one residence, a sawmill, and lumber storage areas.
		Surrounding Properties: Features on surrounding properties included residences to the north; railroad tracks to the south; residences and a lumberyard to the east; and residences and a vacant lot to the west.
1929	No	**Subject Property:** The Subject Property is occupied by a sawmill, a small office building, cement storage areas, and lumber storage areas.
		Surrounding Properties: Features on surrounding properties included residences to the north; railroad tracks to the south; residences, stores, and a lumberyard to the east; and residences, a small office building, and a small storage building to the west.
1949	No	**Subject Property:** The Subject Property is occupied by one residence and S&H Bearing Manufacturing Co. S&H Bearing Manufacturing Co. is comprised of one chemical manufacturing building, one machine shop, two storage buildings, and a foundry.
		Surrounding Properties: Features on surrounding properties included residences to the north; railroad tracks to the south; residences and a coal yard to the east; and offices and a small storage building to the west.
1959	No	**Subject Property:** The Subject Property is occupied by one residence and Bronze Bearings Inc. Bronze Bearings Inc. is comprised of one chemical manufacturing building, one machine shop, two storage buildings, and a foundry.
		Surrounding Properties: Features on surrounding properties included residences to the north; railroad tracks and a gas station to the south; residences, a coal yard, and an electric motor repair shop to the east; and a residences and Union County Mosquito Commission to the west.

4.3.3 Topographic Maps

Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. Other notable features such as woods, pipelines, municipal boundaries, and areas of filled land are often marked on topographic maps.

A search for historical topographic maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical topographic maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of selected topographic maps are presented in Appendix F.

TOPOGRAPHIC MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1947, 1955, 1970, 1981, 1995, 2014	No	**Subject Property:** The Subject Property is shaded to represent urban development; no distinct structures or other notable features are depicted.
		Surrounding Properties: The surrounding properties are shaded to represent urban development. Railroad tracks are depicted to the south.

4.3.4 Street Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by Environmental Data Resources, Inc. (EDR). Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix F.

**It should be noted that the Subject Property includes the following street addresses: 338-346 North Avenue East.*

STREET DIRECTORY SUMMARY		
Year	**Issues Noted**	**Occupants**
2014, 2010, 2005, 2000, 1995, 1992, 1987	No	Multiple office tenants listed, none of which appear to represent an environmental concern (340 North Avenue East)
1982	No	Bergen & Sons; Management Computer Systems (344 North Avenue East)
1979, 1977	No	Bergen & Sons (344 North Avenue East)
1974	No	Vacant (338 North Avenue East) Bergen & Sons (344 North Avenue East) The Gift Showroom (346 North Avenue East)
1969	**Yes**	Harco Chemical Company (338 North Avenue East) Bergen & Sons (344 North Avenue East) Cranford Raceways (346 North Avenue East)
1964	**Yes**	Harco Chemical Company (338 North Avenue East) Vacant (340 and 344 North Avenue East)

4.3.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3.6 Property Tax Records

The property card for the Subject Property was obtained at the Cranford Assessor's Office. The property card identifies the current owner as Northside Realty LLC, which acquired the Subject Property in 1989. Assessor's Office records indicate that the existing building was constructed in 1985. A listing of the former Subject Property owners was not available for review.

4.3.7 Environmental Liens and Activity and Use Limitations

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

4.3.8 Previous Environmental Reports

EBI was provided with the following previous environmental reports performed for the Subject Property:

Phase I Environmental Site Assessment, Northside Realty Company, 340 North Avenue East, Cranford, New Jersey, prepared by Mid-Atlantic Associates (MAA) of North Wales, Pennsylvania, dated May 1, 2002

The MAA Report was completed in general conformance with ASTM Standard E 1527-00. The scope of the MAA Report investigation included visual reconnaissance of the Subject Property, interviews with knowledgeable persons associated with the Subject Property, review of available regulatory information contained within federal and state environmental databases and other local environmental records, review of the physical characteristics and history of the Subject Property. The following information was presented in the MAA Report:

Note: Pages 6 and 11 are missing from this 2002 Phase I ESA

- At the time of the MAA Phase I ESA, the Subject Property was occupied by a three-story commercial office building. This building was constructed in 1984-1985, and was heated by natural gas.
- MAA did not observe staining at the Subject Property during the assessment.
- The Subject Property was not identified on the 2002 EDR Report.
- No USTs were identified at the Subject property during the 2002 assessment.
- The 2002 MAA Phase I ESA does not appear to identify any RECs or other significant environmental concerns.

Environmental Transaction Screen Report, 340 North Avenue East, Cranford, New Jersey, prepared by Salem Environmental LLC Testing & Consulting (SE) of Flemington, New Jersey, dated April 11, 2019

- At the time of the SE Report, the Subject Property was occupied by a three-story commercial office building. This building was constructed in 1984-1985.

- No evidence of vent pipes, fill ports, concrete pads of other evidence of USTs was identified during SE's 2019 assessment.

- No evidence of Potential Environmental Concerns (PECs) was identified during this 2019 SE Transaction Screen. SE stated, "No additional action is warranted."

Relevant information from the previous reports is discussed in the appropriate sections of this report, and portions of the previous reports are presented in Appendix G.

4.3.9 Other Historical Records and Interviews

Mr. Ron Abram, the Subject Property's Maintenance Supervisor, was interviewed to obtain information regarding the history of the Subject Property. According to Mr. Abram, he has been familiar with the Subject Property for approximately 32 years and that the existing building was constructed in 1985. Mr. Abram stated that he was unaware of the use or occupants of the Subject Property prior to 1985.

5.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Mr. Evan Hersch, EBI Field Assessor, on May 15, 2019. Mr. Hersch was accompanied by and interviewed Mr. Ron Abram, the Subject Property's Maintenance Supervisor.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise.

At the time of the survey, the weather was sunny and approximately 63° Fahrenheit. During the survey, representative tenant spaces, mechanical spaces, and/or equipment components were observed. There were no significant portions of the Subject Property that were inaccessible or excluded from this survey.

5.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

5.2.1 Hazardous Substances and Petroleum Products (Identified Uses)

Notable hazardous substances or petroleum products in connection with identified uses observed at the Subject Property are described below.

HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS			
General Type of Material	**Approximate Quantity / Container / Material**	**Location**	**Storage Condition**
Cleaning Compounds and Janitorial Supplies	Various sized containers, ranging from aerosol cans to five-gallon pails	Janitorial Storage Areas	Good: No leaks or spills

EBI did not identify evidence of significant leaks, spills, or the improper handling of petroleum or hazardous substances that might impact the environmental condition of the Subject Property.

5.2.2 Hazardous Substances and Petroleum Products (Unidentified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.3 Unidentified Substances Containers

EBI did not observe evidence of unidentified substances containers at the Subject Property.

5.3 WASTE GENERATION, STORAGE, AND DISPOSAL

EBI identified the following waste streams generated at the Subject Property:

WASTE GENERATION, STORAGE, AND DISPOSAL			
Classification	**Type of Waste / Generation Process**	**Type of Storage / Location**	**Disposal Method / Contractor**

WASTE GENERATION, STORAGE, AND DISPOSAL			
Classification	**Type of Waste / Generation Process**	**Type of Storage / Location**	**Disposal Method / Contractor**
Non-regulated Solid Waste	Municipal Solid Waste / Routine Site Operations	1 Solid Waste Dumpster (Southwest Portion of the Subject Property)	Galluzzo Brothers
Non-regulated Liquid Waste	Sanitary Sewage / Routine Site Operations	NA (Municipal Sanitary Sewer)	Township of Cranford
Regulated Solid or Liquid Waste	None identified	NA	NA
Biomedical Waste	None identified	NA	NA

5.4 UNDERGROUND STORAGE TANKS (USTS) & ABOVEGROUND STORAGE TANKS (ASTS)

5.4.1 Existing Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of existing USTs or ASTs located at the Subject Property.

5.4.2 Former Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of USTs or ASTs formerly having been located at the Subject Property.

5.5 OIL-CONTAINING EQUIPMENT AND POLYCHLORINATED BIPHENYLS (PCBS)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). In accordance with *US Code of Federal Regulations Title 40 - Protection of Environment, Chapter I - Environmental Protection Agency, Subchapter R - Toxic Substance Control Act (TSCA), Part 761 - Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of a transformer or other PCB-containing equipment is responsible for equipment maintenance and remediation in the event of a leak or release.

Based upon the date of construction, no potential PCB-containing equipment was identified at the Subject Property. However, the following oil-containing equipment was identified at the Subject Property:

OIL-CONTAINING EQUIPMENT			
Classification	**Type of Equipment**	**Year Installed / Location**	**Staining / Releases Identified**
Transformers and Fluid-Containing Electrical Equipment	(1) Pad-mounted Electrical Transformer [PSE&G Electric Company]	1985 / Southern portion of the Subject Property	No
Hydraulic Equipment	(1) 2,500-pound passenger elevators	1985 / Main Lobby	No

OIL-CONTAINING EQUIPMENT			
Classification	**Type of Equipment**	**Year Installed / Location**	**Staining / Releases Identified**
Other Oil-containing Equipment	None identified	NA	NA

5.6 ADDITIONAL SITE CONDITIONS

The following is a summary of visual and/or physical observations of the Subject Property on the day of the site visit. Photographs of pertinent Subject Property features are presented in Appendix A.

ADDITIONAL SITE CONDITIONS	
Condition	**Identified**
Interior Drains, Trenches, or Sumps	**Yes**
Interior Stains or Corrosion	No
Unusual Odors	No
Interior Pools of Liquid	No
Stained Soil or Pavement	No
Stressed Vegetation	No
Indications of Solid Waste Disposal	No
Exterior Pits, Ponds, or Lagoons	No
Wastewater or Stormwater Discharge/Disposal	No
Oil-Water Separators or Clarifiers	No
Septic Systems or Cesspools	No
Wells (Drinking Water Wells, Monitoring Wells, Agricultural/Irrigation Wells, or Process Water Wells)	No
Petroleum or Natural Gas Pipelines/Easements	No

Floor drains and sumps were observed in the elevator pit and ground floor portions of the building. The floor drains and sumps reportedly discharge to the municipal sewer system. No staining or other evidence of a release of hazardous substances or petroleum products was observed in the vicinity of the floor drains or sumps.

6.0 INTERVIEWS

The site contact or Key Site Manager was contacted to be interviewed to obtain information regarding recognized environmental conditions in connection with the property. Additionally, a Pre-Survey Questionnaire was forwarded to the designated Subject Property contact. The Pre-Survey Questionnaire has been completed and returned to our offices. The information requested in the Pre-Survey Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The Pre-Survey Questionnaire and any accompanying documentation are presented in Appendix C.

KEY SITE MANAGER INTERVIEW			
Contact / Affiliation	**Date of Communication**	**Years Associated with Subject Property**	**Telephone No.**
Mr. Ron Abram Maintenance Supervisor Northside Realty LLC	05/15/2019	32	(908) 578-3939
Mr. Rob Bogash Broker Sitar Commercial Real Estate	05/15/2019	12	(732) 319-4680
Amber A. Satterly Senior Project Manager Brinkerhoff Environmental Services	05/23/2019	NA	(732) 223-2225

Pertinent information from the interviews is presented in applicable sections of this report.

7.0 CONSIDERATIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13

The following sections address environmental issues or considerations at the Subject Property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM Practice E 1527-13 (non-scope considerations).

7.1 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable materials are those that can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

EBI conducted a limited visual screening survey for the presence of ACM at the Subject Property. EBI identified friable suspect ACM in the form of wallboard and acoustical ceiling tile, and non-friable suspect ACM in the form of vinyl floor tile and associated mastic and roofing materials. These materials were observed to be undamaged and in good condition at the time of assessment. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems.

It should be noted that the limited visual screening survey conducted under the scope of work for this assessment does not constitute a full asbestos inspection, in which all areas of the building would have been thoroughly surveyed and sampled. The possibility exists for ACM to be present in areas of the building not accessed or sampled by EBI personnel. Based on the limited scope of this assessment, additional suspect ACM may also present in areas of the buildings that were accessed as part of this assessment.

Due to the continued distribution of a wide variety of asbestos-containing building materials, asbestos may be present in some of the roofing, flooring, wall and ceiling materials, caulking/putties, adhesives, spackling compounds, and insulation materials, as well as other building materials that may be used at the Subject Property. Sampling many of these materials requires techniques that may be destructive to subject facilities, and in the case of roofing material, may void warranties. It is recommended that an asbestos inspection be performed in accordance with all applicable federal, state, and local regulatory requirements prior to renovation, demolition, or other activities that could cause a material disturbance. Any removal or disturbance of ACM or suspect ACM should be performed by properly trained personnel and in compliance with federal, state, and local regulations.

7.2 RADON

Radon is a naturally-occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a cause of

lung cancer. Radon usually enters a building through openings in the foundation, and therefore is a potential health concern to residents of the lowest level of a building with inadequate ventilation.

The EPA Map of Radon Zones indicates that Union County is located within a Zone 2 radon area. Zone 2 is defined as an area that has a moderate potential for radon gas, with a predicted average indoor radon screening level between 2.0 picoCuries per liter (pCi/L) and 4.0 pCi/L. The EPA recommended Action Level for radon is 4.0 pCi/L.

Based upon the non-residential nature of the Subject Property and in accordance with the scope of work for this assessment, EBI did not conduct a limited short-term radon screening at the Subject Property.

7.3 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm^2) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Based on the non-residential use of the existing building and in accordance with the scope of work of this assessment, a lead-based paint (LBP) survey was not conducted at the Subject Property.

7.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing systems such as lead solder, brass, bronze, and other lead containing alloys. The EPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg /L).

Municipal water service is provided to the Subject Property by New Jersey American Water. Based upon information provided by EPA web site (http://www.epa.gov/safewater), the municipal water supply meets all current criteria and standards established by the Safe Drinking Water Act (SDWA), including those for lead. Based upon the existing municipal water service and in accordance with the scope of work for this assessment, EBI did not conduct lead-in-drinking water sampling at the Subject Property.

7.5 LIMITED MICROBIAL SURVEY

Microbial growth (e.g., mold or fungus) on building materials may occur when excess moisture is present. Porous building materials such as gypsum board, insulation in walls and ceilings, and carpeting retain moisture and become microbial growth sites if moisture sources are not controlled or mitigated. Potential sources of moisture include rainwater intrusion, groundwater intrusion, condensation on cold surfaces, and water leaks from building systems (e.g., plumbing leaks, HVAC system leaks, overflowing drains, etc.). Inadequate ventilation of clothes dryers and shower stalls may also result in excess

moisture conditions. Microbial growth may be clearly visible (e.g., ceramic tile mortar in shower stalls) or may be concealed with no visible evidence of its existence (e.g., inside wall cavities).

Interior areas of the Subject Property building to which access was provided and in which building elements were readily observable were inspected for the presence of moisture and visible or olfactory evidence of microbial development. No disassembly of systems or building components or physical or invasive testing was performed. No observations were conducted within concealed locations (construction elements behind wall and ceiling finishes, and other building components, etc.). The scope of this assessment was limited to visual observations of accessible areas for microbial growth and water damaged materials and did not include the collection and laboratory analysis of bulk samples or air samples to confirm the presence of microbial elements.

Representative observations revealed no obvious visual or olfactory indications of the presence of active moisture or mold activity at the Subject Property. In addition to our observation efforts, a questionnaire provided to Subject Property personnel did not indicate the presence of mold, and Subject Property personnel were not aware of the presence of moisture or mold activity. Based on the interviews and conditions as observed at the time of assessment, mold does not appear to be a concern at the Subject Property.

8.0 FINDINGS AND OPINIONS

EBI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report.

This assessment has identified no evidence of *recognized environmental conditions (RECs)* in connection with the Subject Property, except for the following:

- According to historical resources, the Subject Property was formerly occupied by a chemical manufacturing company and multiple bronze bearing manufacturing companies. The operations spanned from approximately the 1940s through the 1970s. These former chemical manufacturing and bearing manufacturing operations existed primarily in the Subject property's southern portion, which is currently an asphalt parking lot. Based on the nature of these operations, including the presumed use of metals, petroleum products, and solvents, these historical operations are considered a recognized environmental condition (REC) and a potential vapor concern.

In addition, the following *condition outside the scope of ASTM Practice E 1527-13* was identified in connection with the Subject Property:

- EBI conducted a limited visual screening survey for the presence of asbestos-containing materials (ACM) at the Subject Property. EBI identified friable suspect ACM in the form of wallboard and acoustical ceiling tile, and non-friable suspect ACM in the form of vinyl floor tile and associated mastic and roofing materials. These materials were observed to be undamaged and in good condition at the time of assessment. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems. Based on the condition of suspect ACM, these materials do not currently pose a significant environmental threat to the occupants of the Subject Property. Suspect ACM do not present a problem when maintained in good condition. However, additional sampling, removal, and disposal arrangements may be necessary should building construction or renovation activities be conducted. Asbestos is a condition outside the scope of ASTM E 1527-13 and is not considered a recognized environmental condition (REC).

9.0 RECOMMENDATIONS

Based upon the findings of this investigation, EBI offers the following recommendations:

- EBI recommends that a limited subsurface investigation be conducted in order to determine if the Subject Property has been adversely impacted by historical on-site industrial activity.

- EBI recommends the development and implementation of an Asbestos Operations and Maintenance (O&M) Plan for the Subject Property. This O&M Plan provides the procedures and guidelines that, when used during facility cleaning, maintenance, and general operations, will minimize human exposure to asbestos fibers and minimize release of asbestos fibers to the environment. This O&M Plan is a long-term management approach. EBI additionally recommends that a comprehensive asbestos inspection be conducted prior to significant renovation or demolition of the building.

APPENDIX C

PRE-SURVEY QUESTIONNAIRE AND OTHER RELEVANT DOCUMENTATION

Date: May 2, 2019

Environmental Order#: 19-000937-05-01
Borrower: Peter Mercatili

908-380-3309
Property Location: 340 North Avenue East
Cranford, Union, NJ 07016,
Block 317, Lot 19.01

Josh Simon
EBI Consulting
479 State Highway 17, 2nd Floor
Mahwah, NJ07430

Dear Josh Simon:

This letter, including the attached Assignment Summary, confirms your engagement for an environmental assignment on the above captioned property in accordance with your fee quote. Your engagement is as an independent contractor and not as an employee or agent of Columbia Bank. The environmental report must comply with Columbia Bank's Environmental Liability & Risk Policy, the relevant bank reporting guidelines, and the terms specified in this engagement letter.

This assignment may not be subcontracted to an outside individual or firm without Columbia Bank's prior written consent. By accepting the assignment, you affirm that:

1. Neither you, your employees, or associates have an interest in the real estate described in the engagement and/or a personal, business, or client relationship with either the owner and/or the prospective purchaser of the property.
2. The signing environmental professional(s) have the requisite competency/experience to complete this assignment.
3. You hereby represent that you and your firm have a minimum of $1,000,000 in Errors and Omissions Insurance coverage and that there are no pending claims against you. You further agree not to include any statement within the written report you submit to Columbia Bank that would purport to limit, in any way, your liability or the amount of damages for which you may be held liable, and you hereby acknowledge that any such statements that do appear in your report or any other document are hereby waived, without effect and shall not be enforceable against Columbia Bank.

Columbia Bank is your client in connection with this engagement. You hereby agree to keep all information regarding Columbia Bank, the borrower, and the proposed transaction referenced herein strictly confidential and not to disclose any such information to any third party.

All conclusions and methodology are to be discussed only with Columbia Bank's Appraisal Department staff, and specifically not with the borrower or Columbia Bank's lending staff.

Please make arrangements for property inspection within one business day of the receipt of this letter. If you have difficultly gaining access to the property or obtaining information, please contact the Job Manager. Unless an alternative scope of work is approved by the Job Manager, the interior and exterior of the subject property must be inspected for all Transaction Screens and Phase I Environmental Site Assessments.

If you determine that the report will not be delivered by the due date specified, please contact the Job Manager as soon as possible, but no less than five business days prior to the due date. During the course of the assignment, should you discover any atypical issues that may impact the veracity of the report, please notify the Job Manager through rimscentral.com no less than five business days prior to the due date.

A searchable electronic copy of the report in PDF format must be uploaded to rimscentral.com. All file names must use the following format, with an example that follows:

Address_Municipality_County(First 3 Ltrs)_State_DocDate_Document Type

123_Main_St_Hometown_BER_NJ_01-01-14_Com_Aprsl

Please reference the borrower, the subject property address, RIMS project number, and loan number [if available] in all correspondence and reports [cover page and transmittal letter]. Upon satisfactory review of the report, you will be notified to mail a hard copy of the report to the Bank. Upon receipt of the report, the bank will process your invoice for payment.

Payment of the fee is subject to a review of the report for compliance with the above mentioned requirements by Columbia Bank's authorized reviewers. Acceptance of an assignment from Columbia Bank indicates the signing environmental professional(s) will cooperate with the bank's review staff in providing clarification or supplemental information to the report. Environmental professionals should respond to the reviewer in a timely manner, generally within one to two business days. In the event that Columbia Bank elects to pay the professional fee prior to the completion of the review process, the environmental professional's obligation to cooperate during the review process may extend beyond the payment of the professional fee.

Your acceptance of this assignment acknowledges that the report will be completed under the terms specified in this letter. Please include a complete copy of this engagement letter in the addenda to the report.

Any questions pertaining to this assignment should be addressed with the Columbia Bank contact.

Sincerely,

Soledad Cespedes (JM)
Appraisal Assignment Coordinator II

ASSIGNMENT SUMMARY

Date Report Due:	5/23/2019
Total Professional Fee:	$1,900
Cost Center:	**00230 (Please include on all invoices)**
Property Location:	340 North Avenue East
	Cranford, Union, NJ07016
Property Type:	Office - Office Building-Low-Rise
Property Description:	The subject property is a 6-unit office building maintaining 3 stories totaling 36,300+/- square feet. The total site area is 1.52+/- acres.
Intended Use:	The intended use of this report is for loan underwriting and-or credit decisions by bank and-or participants.
Intended User:	The intended users of this report is Columbia Bank and-or affiliates
Purpose:	In the case of Phase I assignments, the purpose is to identify the presence or likely presence of Recognized Environmental Conditions [REC] on the property or impacting the property, as well as any Non-Scope Considerations, and to assess the need for further investigation to address specific areas of concern.
Non-Scope Considerations:	For Phase I and Transaction Screen Reports, a visual survey for asbestos and lead based paint is required. The reporting of the radon tier level is required.
OPRA/FOIA Requests:	For Phase I and Transaction Screen Reports, should the EP determine that a regulatory file review is needed for either the subject property and-or a nearby property, please file the OPRA/FOIA request. Please no not wait until the report is delivered to file the request(s). When the response from the OPRA/FOIA request is received, please advise the Job Manager so that the bank can determine if the Scope of Work should be expanded to include the file review.
Report Type:	Environmental Site Assessment: Phase I based on ASTM-1527-13
Additional Work Scope:	An Licensed Site Remediation Professional [LSRP] cannot prepare this report or inspect the property.
RFP Comments:	None noted.
Award Comments:	When completed, please upload an electronic copy of your report, invoice (as a separate file), and any other associated documents to http://www.rimscentral.com. The department will notify you when a hard-copy report is required.

Please fill out and sign this questionnaire to the best of your knowledge for the Scientist's site visit. Email to Kim Holland at REResearchGroup@ebiconsulting.com or fax to781-425-3623, for our report files, and keep the original to provide to the Scientist.
6.

Subject Property Name: 340 NAE, LLC EBI Project #: 1119002709

Address: 340 North Avenue East Cranford NJ

Subject Property Owner: Purchase Date: June 2014

On-Site Property Contact: Peter Mercatili. Telephone: 908-380-3309

Fax: 732-855-1905 Email: Pmercatili@Aol.com

Your Name and title Peter Mercatili. Signature 5/6/15 Date

Additional plans and documentation (see page 4) must be forwarded to the site for the Scientist during the survey. For questions not applicable please respond "N/A." Attach additional pages if necessary. This questionnaire and your responses will be included as an exhibit in the Environmental report. Accurate and full completion is critical to a timely completion of our reports, and timely loan closing.

LOCAL JURISDICTIONAL INFORMATION

1. What is the property ID #, Lot and Block, or Township/Range ID #?
2. What is the legal Municipality or County that has jurisdiction over the property? Cranford
3. What is the assessors file ID number and tax file ID number if available?

PROPERTY INFORMATION

4. What is the size of the subject property lot or lots, in acres? 1.519
5. How many buildings comprise the subject property? 1
   a. If the property is a mall or large retail center, please confirm and list ownership of each building. N/A
6. What is the gross and net rentable square footage of the building(s)? ± 36,000
7. What is the date of construction of the building(s)? When was the building(s) first occupied? 1980's
8. How many tenant spaces or apartments are at the Subject Property? 6
9. Please list, to the best of your knowledge, any structural, water infiltration, mold, roof, plumbing, HVAC, Fire Alarm or electrical deficiencies or problems. None
10. Please list any deficiencies noted during any Building, Fire or Health Department inspections in the last three years. None
11. Please list the following utility providers:
    Water:
    Sanitary Sewer: Public
    Trash Hauler: and, Frequency of Pick-ups:
    Electricity: PSEG
    Storm Drainage:
    Natural Gas or Oil: Nat Gas
12. Please attach a brief history of the property.

ENVIRONMENTAL SITE ASSESSMENT PRE-SURVEY QUESTIONNAIRE

1. Describe the current uses of the property noting tenant names and oil/chemical usage. Commercial office

2. Describe the past uses of the property noting tenant names and oil/chemical usage. Commercial Office

3. (Y) (N) Has a previous environmental site assessment report been prepared for the property? If yes, for what reason? Can EBI have a copy? Yes See ATTACHED

4. (Y) (N) Has a subsurface investigation (Phase II) ever been conducted on the property, including soil sampling, groundwater sampling, or installation of groundwater monitoring wells? If yes, for what reason? What were the results? Can EBI have a copy of the report? Are there any groundwater monitoring wells currently located on the property? NO

5. (Y) (N) Has contamination been identified at the Subject Property? Describe the nature of the contamination (i.e., source, media impacted, location, sampling, cleanup activities, regulatory status, etc.). Can EBI have copies of related documentation? N/A

6. (Y) (N) Has a spill or surficial release occurred at the Subject Property? Describe the nature of the spill/surficial release (i.e., source, location, response/cleanup actions, regulatory status, etc.). Can EBI have copies of related documentation? N/A

7. (Y) (N) Is the Subject Property listed with the USEPA and/or the state environmental regulatory agency as a contaminated site? If yes, please describe. Can EBI have copies of related documentation? NO

8. (Y) (N) Has there ever been previous sampling for Asbestos, Lead-Based Paint, Lead in Water, or Radon? If yes, please describe. Can EBI have copies of related documentation? NO

9. (Y) (N) Has there been any Asbestos or Lead-Based Paint abatement or Radon mitigation conducted at the Subject Property? Are there Asbestos and/or Lead-Based Paint Operations and Maintenance Plans for the Subject Property? If yes, please describe. Can EBI have copies of related documentation? NO

10. (Y) (N) Any known environmental liens, deed restrictions, or use limitations for the Property? If yes, please describe. Can EBI have copies of related documentation? NO

11. (Y) (N) Any permitted or regulated activities (Hazardous waste generator, air) on the Property? If yes, please describe. NO

12. (Y) (N) Are there any transformers or other electrical equipment, which may contain PCBs? If yes, please describe. Where are they? Who owns the transformer(s)? Who services them? NO

13. (Y) (N) Has an industrial or manufacturing operation, gas station, motor repair facility, commercial printing facility, dry cleaners, photo-developing laboratory, junk yard, landfill or waste, treatment, storage, disposal processing or recycling facility ever been located at **or** adjacent to the property? If yes, please describe. NO

14. (Y) (N) Are there any discarded drums, barrels or containers, construction debris, damaged or discarded automobile or industrial batteries, or pesticides, paints or other chemicals in individual containers or drums of greater than five gallons or fifty gallons in aggregate located on the property? If yes, please describe. NO

15. (Y) (N) Have there ever been any waste storage or treatment lagoons, pits, ponds, or surface impoundments on the property? If yes, please describe. NO

16. (Y) (N) Does the property have floor drains not discharging to a sewer? Septic System? If yes, please describe. NO

17. (Y) (N) Are there currently aboveground or underground storage tanks at the property? If yes, complete table.

Type of Tank	Size	Content	Installation Date	Spill/Leak Detection? Y or N
Above or Underground	gal			
Above or Underground	gal			
Above or Underground	gal			
Above or Underground	gal			

18. Are you aware of any information to indicate that the Subject Property was sold for substantially below its fair market value? If so, please provide an explanation: NO

19. Additional comments and/or pertinent information relevant to this Phase I ESA: N/A

Document and Information Checklist

Please provide the following information (as much as possible in electronic format) so the Scientist can proceed with the survey of the property.

A. Plans	B. Municipal Documents	C. Additional Information
▪ ALTA Survey or Site Plan ▪ Reduced scale Site and Building Plans	▪ Certificate of Occupancy ▪ Building Permit ▪ Copy of tax cards ▪ UST/AST Registrations	▪ Tenant Rent Roll ▪ Historical Uses ▪ Previous Due Diligence Reports ▪ Copy of most Recent Appraisal

EBI Access Requirements

At the time of the site visit the Consultant is required to gain access to all areas of the property. This includes:

- All building interiors, including as applicable, common areas, lobbies, a representative sampling of offices, retail spaces, manufacturing or assembly areas, or apartments, community rooms, exercise rooms, pool areas, storage rooms, attics and basements, garages.
- All building perimeters
- All site amenities
- All building roofs, unless pitched asphalt shingles. This may require you to obtain and provide a ladder.
- All mechanical, electric, sprinkler, HVAC, utility, service, elevator, storage and equipment rooms

The New Jersey Department of Environmental Protection (NJDEP), acknowledges the receipt of your Open Public Records Act (OPRA) record request. The NJDEP will respond to your request within seven (7) business days.

If you have any questions, please contact the Office of Record Access at (609) 341-3121, or e-mail our office at: records.custodian@dep.nj.gov. The assigned OPRA Record Request Tracking #, identified in the Subject Line of this email, will facilitate future communications with our office.

Thank you,

NJDEP - Office of Record Access

Evan M. Hersch
Project Scientist
6866 Susquehanna Trail
York, PA 17403
Office: 717.428.0401 Mobile: 856.534.8246
Home: 856.534.8246

SUMMARY OF EXPERIENCE

Mr. Hersch is a project scientist with 14 years of experience handling all aspects of an environmental investigation. He is skilled and experienced in completion of the following project-types: Phase I ESAs; Phase II ESAs; senior-level project reviews; soil/groundwater sampling and remediation; subsurface air monitoring; concrete core-drilling and more.

Over the course of his career, Mr. Hersch has completed over 200 Phase I ESA Reports; collected and managed a variety of different types of samples; compiled and interpreted various laboratory results; directed soil removal excavations; conducted over 100 rounds of landfill gas monitoring and reporting; performed asbestos evaluations; operated various field-sampling devices and concrete core-drills; and supervised sample collection on projects utilizing drilling rigs and GeoProbe equipment.

Mr. Hersch also has experience as a senior-level reviewer and as a national client manager. He has provided reviews for over 100 Phase I Environmental Site Assessment (ESA) Reports; completing numerous desktop reviews (peer reviews); and staffed numerous projects nationwide. Mr. Hersch is also proficient with EDR's PARCEL Platform.

Mr. Hersch has taught and provided extensive training to several fellow employees throughout his years in the industry and possesses very good leadership skills, writing ability, communication skills, grammar, creativity and overall professional decorum.

RELEVANT PROJECT EXPERIENCE

Mr. Hersch has conducted over 200 Phase I ESA's throughout New Jersey. This includes completing the site investigations, identifying areas of concern, obtaining and reviewing all available historic data and preparing the ESA report for the client. Additionally, Mr. Hersch has conducted approximately 50 Preliminary Assessment reports for daycare centers throughout New Jersey.

Mr. Hersch has directed soil removal excavations at several New Jersey daycare centers. In most cases, levels of historic pesticides and/or lead were discovered at levels higher than the NJDEP allowable limits and soil removal was required. Mr. Hersch handled all sampling and delineation duties, NJDEP correspondence, excavation details, soil disposal arrangements, clean-fill purchasing, report writing, client communications and invoicing throughout the duration of the projects.

Mr. Hersch has conducted over 200 rounds of groundwater and drinking water sampling/monitoring at several New Jersey gas stations and surrounding residential areas. Mr. Hersch collected samples from several monitoring wells at each site, then analyzed laboratory results, created isopleth maps and recorded the associated data to assess the impact that the leaking USTs had on the surrounding residential areas.

Mr. Hersch has managed several ongoing Landfill Gas Survey Monitoring Reports for landfills throughout New Jersey. Responsibilities included utilizing gas-monitors to measure a variety of gases from designated monitoring points at the landfills and writing the associated reports.

EBI Consulting
environmental | engineering | due diligence

Evan M. Hersch
Project Scientist
6866 Susquehanna Trail
York, PA 17403
Office: 717.428.0401 Mobile: 856.534.8246
Home: 856.534.8246

Mr. Hersch has assisted in an extensive ongoing asbestos evaluation project in Essex County government buildings. Duties included measuring linear footage of suspected asbestos piping, calculating the square-footage of mastic floor-tiles/ceilings and taking photographs of areas throughout the complex.

Mr. Hersch has directed a soil removal excavation at a South Jersey marina. Dredge spoils were discovered beneath the surface in one section of the property that required removal. Mr. Hersch's duties included overseeing and organizing the excavation, determining which soils were to be removed, collecting and managing samples from the site and preparing the associated report.

Mr. Hersch has conducted several rounds of lake-water sampling at a private residential lakes community. The data was then compiled and the results were analyzed to determine the level of impact that rainwater runoff from a local shopping center's parking lot was having on the lakes.

David V. Maglietta
Program Manager
6876 Susquehanna Trail South
York, PA 17403
Office/Mobile: 410.499.8833

Summary of Experience

Mr. Maglietta is an environmental scientist with over 31 years of experience in performing and managing environmental investigations and site assessments in the U.S., Canada, and Mexico. Mr. Maglietta also has extensive experience conducting regulatory file reviews and performing asbestos, radon, lead paint, lead in water, and indoor air quality surveys.

Mr. Maglietta has performed or managed over 12,000 Phase I and II Environmental Site Assessments, Transaction Screens, Desk Reviews, Database Reviews, and regulatory file reviews for a wide range of properties for the purpose of evaluating site conditions, potential off-site liabilities, and site remediation costs. These services have been performed in order to advise property owners, operators and prospective purchasers of potential and existing environmental concerns. Mr. Maglietta has worked with corporate environmental officers, numerous Wall Street lending institutions, legal counsel, governmental agencies including HUD, SBA, FDIC and state governments, rating agencies, investment companies and real estate brokers to develop strategies for managing properties with environmental concerns.

Relevant Project Experience

Environmental Site Assessments: Mr. Maglietta has conducted ASTM Phase I Environmental Site Assessments, Environmental Site Screenings, and soil and groundwater sampling for various clients and has prepared Phase I and Phase II reports for a variety of properties located in the United States, Canada, and Mexico. These properties have included industrial, commercial, retail, healthcare, raw land, and multi-family residential properties. Mr. Maglietta has provided project management for underground storage tank removals and site characterizations, and has performed sampling for radon, asbestos-containing materials, lead-based paint and lead in water.

Subsurface Investigations: Mr. Maglietta has completed subsurface investigations at retail, commercial and industrial properties. Subsurface investigations have included direct-push sampling methodology, hollow-stem auger methodology, the installation of soil borings and shallow and deep groundwater monitoring wells, and subsequent sampling of soil and groundwater.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
BODYCOTE THERMAL PRO EPA ID:: NJD002172278	***304 COX ST***	***ESE 1/2 - 1 (0.658 mi.)***	***DA433***	***597***

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CRANFORD PUBLIC WORK EPA ID:: NJR000001602	364 NORTH AVE E	ENE 0 - 1/8 (0.066 mi.)	C22	30

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

PREMIER UROLOGY GROU EPA ID:: NJR000074872	***570 SOUTH AVE - EAST***	***SE 0 - 1/8 (0.083 mi.)***	***F34***	***76***

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

NJ HWS RE-EVAL: The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

A review of the NJ HWS RE-EVAL list, as provided by EDR, and dated 09/20/2007 has revealed that there are 7 NJ HWS RE-EVAL sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

NJ UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection & Energy's UST Data.

A review of the NJ UST list, as provided by EDR, and dated 10/17/2018 has revealed that there are 11 NJ UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State and tribal voluntary cleanup sites

NJ VCP: Through the VCP, responsible parties, developers, local officials, or individuals may work with the department to remediate non-priority contaminated sites that pose no immediate threat to human health or the environment.

A review of the NJ VCP list, as provided by EDR, and dated 01/12/2018 has revealed that there are 25 NJ VCP sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

NJ ISRA: The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

A review of the NJ ISRA list, as provided by EDR, and dated 10/10/2018 has revealed that there are 19 NJ ISRA sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk

Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

NJ RGA HWS: The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the New Jersey Department of Environmental Protection in New Jersey.

A review of the NJ RGA HWS list, as provided by EDR, has revealed that there are 281 NJ RGA HWS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

NJ RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the New Jersey Department of Environmental Protection in New Jersey.

A review of the NJ RGA LUST list, as provided by EDR, has revealed that there are 7 NJ RGA LUST sites within approximately 0.5 miles of the target property.

Facility Has Received Notices of Violations:
Regulation violated: Not reported
Area of violation: Generators - General
Date violation determined: 01/27/1987
Date achieved compliance: 01/28/1987
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 01/27/1987
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: State
Proposed penalty amount: Not reported
Final penalty amount: Not reported
Paid penalty amount: Not reported

Evaluation Action Summary:
Evaluation date: 07/31/2009
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State

Evaluation date: 10/29/1996
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State

Evaluation date: 01/27/1987
Evaluation: NON-FINANCIAL RECORD REVIEW
Area of violation: Generators - General
Date achieved compliance: 01/28/1987
Evaluation lead agency: State

Incident Desc:	s17-97951 Dredge head broken oil seal; equipment failure BH
Incident Type Desc:	Release/Spill, Oil Sheen/Spill
Comments:	Mr. Brian Smith, Meredith, called in a Non Petroleum Heavy gear oil (Neptune 220) release from a dredging vessel located SW Pass Mile #18, Plaquemines Parish. Weeks Marine Inc. is the responsible party. I contacted Mr. Smith, and he stated that an estimated amount of 25 gallons of the gear oil was released. There was no sheen on the water and the release was unrecoverable. The oil seal on the tank was leaking and was repaired as soon as the problem was observed. No further action will be conducted at this time. MTD

Incident Desc:	s18-115582 Neptune Aw60 Oil seal blowout on an operations hose BH
Incident Type Desc:	Release/Spill, Oil Sheen/Spill
Comments:	A hydraulic oil hose used on moving equipment for marsh rebuilding in the Lost Lake area in Terrebonne Parish ruptured. The result was that approximately 50 gallons of Neptune AW 60 oil was released to the water. Neptune AW-60 is biodegradable, leaves no surface sheen, and completely dissolves in water. The material was not recoverable.

Mailing State:	NJ
Mailing Zip:	070162497
Incident Desc:	s17-100673 Mechanical failure; gear oil release BH
Incident Type Desc:	Release/Spill, Oil Sheen/Spill
Comments:	Weeks Marine Inc. reported a release of oil from Dredge D G Morgan into Lake Pontchartrain on 08/10/2017. An oil cooler was discovered to be leaking oil. The pump was turned off and pulled out of the water. Approximately 20 gallons was released. The product created a rainbow sheen. Absorbent boom was deployed in the area to attempt to recover some product. The remaining product was unrecoverable and allowed to dissipate naturally.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/11/2019
Date Data Arrived at EDR: 03/14/2019
Date Made Active in Reports: 04/01/2019
Number of Days to Update: 18

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/11/2019

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

HIST HWS: Known Contaminated Sites Listing

The Known Contaminated Sites in New Jersey report is a municipal listing of sites where contamination of soil and/or ground water is confirmed at levels greater than the applicable cleanup criteria or standards. Remedial activities are underway or required at the sites with an on-site source(s) of contamination and at locations where the source(s) of contamination is unknown. Sites with completed remedial work that require engineering and/or institutional controls have reporting measures in place to ensure the effectiveness of past actions, and some include maintenance and/or monitoring

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharged occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GW CONTAM AREAS: Groundwater Contamination Areas

This data identifies those sites where groundwater contamination has been identified and, where appropriate, the NJDEP has established a Classification Exception Area (CEA). CEAs are institutional controls in geographically defined areas within which the New Jersey Ground Water Quality Standards (NJGWQS) for specific contaminants have been exceeded. When a CEA is designated for an area, the constituent standards and designated aquifer uses are suspended for the term of the CEA. This data layer contains information about areas in the state which are specified as the Currently Known Extent (CKE) of ground water pollution. CKE areas are geographically defined areas within which the local ground water resources are known to be compromised because the water quality exceeds drinking water and ground water quality standards for specific contaminants.

ISRA: ISRA Database

The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

State Plane Y (Feet):	664412.9
Elevation:	86 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	6049408 ROSELLE, NJ
Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

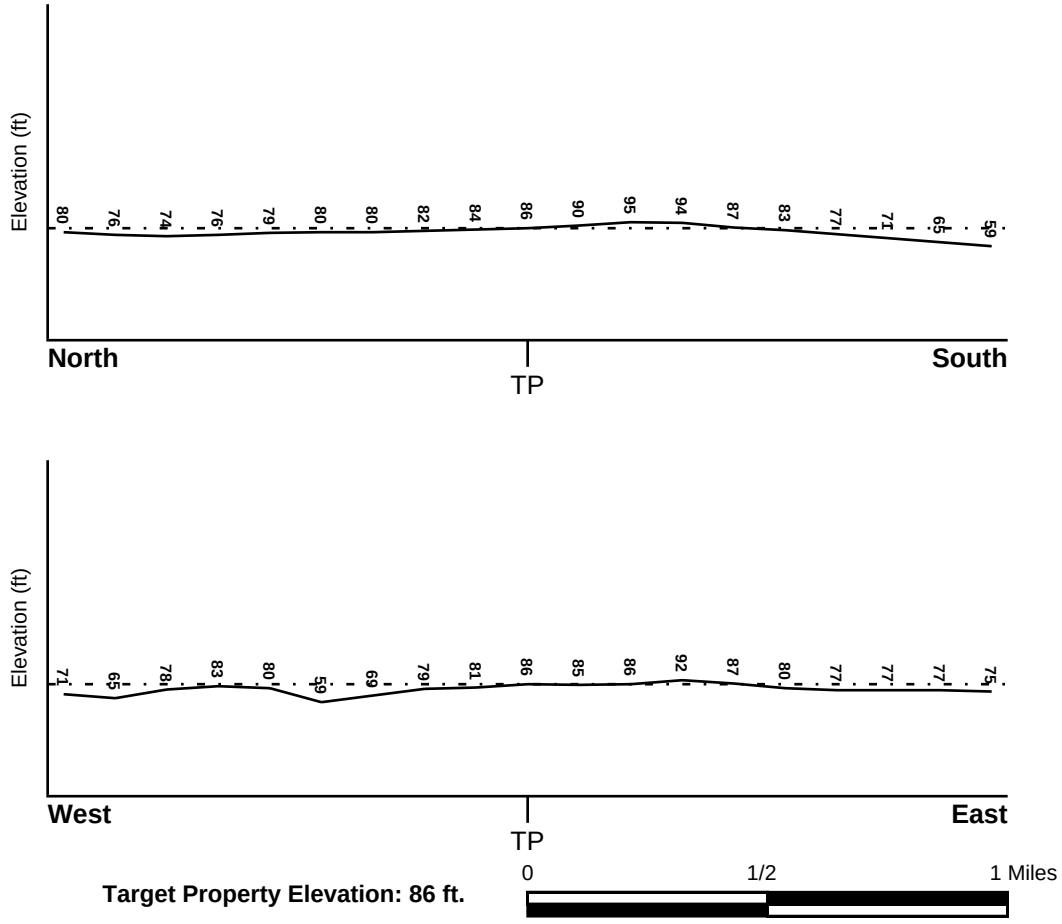
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

34039C0033F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ROSELLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile ESE
Site Name:	Ironbound Heat Treating Co.
Site EPA ID Number:	NJD002172278
Groundwater Flow Direction:	NE TOWARD WEST BROOK.
Inferred Depth to Water:	approximately 23 feet.
Hydraulic Connection:	The surficial aquifer is generally not connected to the underlying bedrock aquifer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Not reported

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name:	Urban land
Soil Surface Texture:	
Hydrologic Group:	Not reported
Soil Drainage Class:	
Hydric Status: Unknown	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name:	Boonton
Soil Surface Texture:	loam
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Moderately well drained
Hydric Status: Not hydric	
Corrosion Potential - Uncoated Steel:	Moderate
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	35 inches	51 inches	loam	Not reported	Not reported	Max: 1.41 Min: 0.42	Max: 6.5 Min: 5.6
2	0 inches	7 inches	loam	Not reported	Not reported	Max: 1.41 Min: 0.42	Max: 6.5 Min: 5.6
3	7 inches	35 inches	gravelly fine sandy loam	Not reported	Not reported	Max: 1.41 Min: 0.42	Max: 6.5 Min: 5.6
4	51 inches	59 inches	loam	Not reported	Not reported	Max: 1.41 Min: 0.42	Max: 6.5 Min: 5.6

Soil Map ID: 3

Soil Component Name: Haledon

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 8 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4.23 Min: 0.42	Max: 7.3 Min: 5.6
2	9 inches	27 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4.23 Min: 0.42	Max: 7.3 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	27 inches	44 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4.23 Min: 0.42	Max: 7.3 Min: 5.6
4	44 inches	59 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4.23 Min: 0.42	Max: 7.3 Min: 5.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Environmental Protection
Telephone: 609-984-2243

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New Jersey Public-Community Water-Supply Wells
Source: Department of Environmental Protection, Geological Survey
Telephone: 609-984-6587

New Jersey Ambient Ground Water Quality Network Data
Source: Department of Environmental Quality
Telephone: 609-984-6587
Ambient Groundwater Quality of the New Jersey Part of the Newark Basin. Natural groundwater quality in the Newark Basin summarize natural groundwater quality in sedimentary bedrock formations of the Newark basin part of the Piedmont physiographic province of New Jersey.

STORET Water Quality Monitoring Stations
Source: Department of Environmental Protection
Telephone: 609-984-6831
STORET maintains the locations of water quality monitoring stations from NJDEP's NJ STORET (Modernized) database. A station is a location at which a data collection event takes place, such a collection of a field sample, measurement of field parameters or evaluation of environmental habitats.

Water Well Permit Information
Source: Department of Environmental Protection
Telephone: 609-984-6831
Permits to drill wells. Once constructed, the driller must submit a well record document with the as-built description of the well. Drillers also submit a well abandonment report whenever a well has been decommissioned.

OTHER STATE DATABASE INFORMATION

RADON

State Database: NJ Radon
Source: Department of Environmental Protection
Telephone: 609-984-5425
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

This material is proprietary and the subject of copyright protection and other intellectual property rights owned by or licensed to Tele Atlas North America, Inc. The use of this material is subject to the terms of a license agreement. You will be held liable for any unauthorized copying or disclosure of this material.

This Report contains certain products owned by or licensed by Tele Atlas North America, Inc. ("TANA") and licensed to EDR pursuant to an agreement between EDR and TANA (the "TANA Agreement"). Such products include the Dynamap® /2000 (commencing with the most current version, nationwide coverage, ArcInfo™ format, tiled by county, with semi−annual Updates) and are referred to in this Report as the "Licensed Products".

The use of the Licensed Products with a non−TANA map may result in increased variance between the location displayed on the map and ground truth location.

The recipient of the Report (hereinafter referred to as an "End User") shall use such Report solely for its internal purposes and not for resale.

U.S. GOVERNMENT RIGHTS. If End User is an agency, department, or other entity of the United States Government, or funded in whole or in part by the United States Government, then use, duplication, reproduction, release, modification, disclosure or transfer of this commercial product and accompanying documentation, is restricted in accordance with the LIMITED or RESTRICTED rights as described in DFARS 252.227−7014(a)(1) (JUN 1995) (DOD commercial computer software definition), DFARS 227.7202−1 (DOD policy on commercial computer software), FAR 52.227−19 (JUN 1987) (commercial computer software clause for civilian agencies), DFARS 252.227−7015 (NOV 1995) (DOD technical data − commercial items clause); FAR 52.227−14 Alternates I, II, and III (JUN 1987) (civilian agency technical data and noncommercial computer software clause); and/or FAR 12.211 and FAR 12.212 (commercial item acquisitions), as applicable. In case of conflict between any of the FAR and DFARS provisions listed herein, the construction that provides greater limitations on the Government's rights shall control. Contractor/manufacturer is Tele Atlas North America, Inc., 11 Lafayette Street, Lebanon, NH 03766−1445. Phone: 603.643. 0330. The Licensed Products are ©1984−2008 by Tele Atlas North America, Inc. ALL RIGHTS RESERVED. For purpose of any public disclosure provision under any federal, state or local law, it is agreed that the Licensed Products are a trade secret and a proprietary commercial product and not subject to disclosure.

If End User is an agency, department, or other entity of any State government, the United States Government or any other public entity or funded in whole or in part by the United States Government, such End User agrees to protect the Licensed Products from public disclosure and to consider the Licensed Products exempt from any statute, law, regulation, or code, including any Sunshine Act, Public Records Act, Freedom of Information Act, or equivalent, which permits public access and/or reproduction or use of the Licensed Products. In the event that such exemption is challenged under any such laws, any and all right to retain any copies or to use of the Licensed Products shall be terminated and considered immediately null and void. Any copies of the Licensed Products held by End User shall immediately be destroyed. If any court of competent jurisdiction considers this clause void and unenforceable, in whole or in part, for any reason, then all Licensed Products previously delivered to End User will be destroyed.

EXECUTIVE SUMMARY

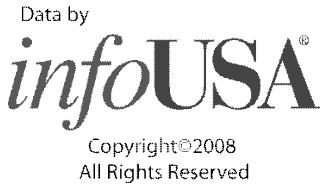
DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.



RESEARCH SUMMARY

QUESTION	OWNER			OCCUPANTS (if applicable)		
18b. Does the property discharge waste water, on or adjacent to the property, other than storm water into a sanitary sewer system?	YES	NO	UNK	YES	NO	UNK
19. Did you observe evidence or do you have any prior knowledge that any *hazardous substances* or *petroleum products*, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the property?	YES	NO	UNK	YES	NO	UNK
20. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	YES	NO	UNK	YES	NO	UNK
21. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? (40 CFR 312.25)	YES	NO	UNK	YES	NO	UNK
22. Are you aware of any AULs (activity use limitations), such as *engineering controls*, land use restrictions or *institutional* controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? (40 CFR 312.26)	YES	NO	UNK	YES	NO	UNK
23. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? (40 CFR 312.28)	YES	NO	UNK	YES	NO	UNK
24. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you concluded that there is a difference, you have considered whether the lower purchase price is because contamination is known or believed to be present at the property? (40CFR 312.29)	YES	NO	UNK	YES	NO	UNK
25. Are you aware of commonly known or *reasonably ascertainable* information about the property that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as user, (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property?	YES	NO	UNK	YES	NO	UNK

The partners of Northside Realty Co. ("Northside") have personal knowledge of the property uses and conditions only from and after the date Northside purchased the property in 1985. Based on their personal knowledge, the property has been used exclusively as commercial office space since its purchase in 1985, and they have no knowledge and are unware of any USTs, asbestos, chemicals, fill, spills or discharges of any type on the property since its purchase in 1985.

Northside received a copy of the Phase I Environmental Site Assessment Report concerning the property prepared by Mid-Atlantic Associates, Inc. and dated May 1, 2002, which was performed on behalf of Sovereign Bank New England as part of the bank's due diligence in making and closing a mortgage refinance in 2002. After its receipt of the Phase I Report, Sovereign Bank closed on the loan. We are not aware of any further or additional environmental assessment. A copy of the May 1, 2002 Phase I Report is attached in the form received by Northside (we note that pages 6 and 11 are missing, but this is as we received it).

Northside partners do not have any knowledge or information of the historic uses and/or conditions of the property except as set forth in the May 1, 2002 Phase I Report. Northside refers Metuchen Savings Bank to the May 1, 2002 Phase I Report to answer all questions with regard to historic uses and conditions of the property.

With regard to Metuchen Savings Bank Site Questionnaire as to property known as 340 North Avenue, Cranford, NJ, Northside responds to each question "No, except as may be stated in the May 1, 2002 Phase I Report," except as to the following questions: 13.a -- response is Not Applicable, and 24 -- response is Yes, this property is sold at fair market value.

Northside Realty Co.

- Conduct interviews with the current site owner(s) and/or "knowledgeable site personnel" to determine current and/or historical on-site activities that may be relevant to the site and/or adjoining properties;

- Review selected, available, historical information, including aerial photographs, Sanborn Fire Insurance Maps and topographic maps (where coverage is available) of the site and surrounding properties to determine on-site and off-site historical activities;

- Review lists published by selected state and federal environmental regulatory agencies for records or comments pertaining to past or present environmental concerns at the site and/or within the specified "search distances" from the site. These search distances adhere to the standard distances proposed by the ASTM;

- Contact the New Jersey Department of Environmental Protection (NJDEP) to determine if a facility file exists for Northside Realty Company and if available, conduct a NJDEP file review to determine an adverse, environmental impact on the subject site;

- Perform a vehicular reconnaissance of selected areas to verify the location of listed facilities within search distances specified by ASTM and to assist in visually identifying nearby land use which may create the potential for an adverse, environmental impact on the subject site;

- Conduct a chain-of-title review at the Union County Recorder of Deeds to assist in determining the past and present ownership of the subject site; and

- Provide a written final report summarizing the PESA observations, interviews, file reviews, findings and conclusions.

As contracted, the scope of work of this PESA did not include sampling for asbestos, lead-based paint or radon, wetlands identification, sampling of the air, soil, surface water or groundwater. Pursuant to Sovereign Bank's criteria, the only additional scope added included a visual assessment for suspect ACMs.

Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by reputable environmental consultants practicing in this or similar localities. No other warranty, expressed or implied, is made as to the professional information included in this report.

It is Mid-Atlantic's understanding that this report is for the sole purpose of providing an environmental assessment of the subject site in order to conclude a real estate transaction. The party or parties involved in this specific transaction, as authorized by the addressee, may rely upon the findings and conclusions provided in this report. Any reliance on this report by any other party shall be at such party's sole risk and Mid-Atlantic disclaims liability for any such use or reliance by third parties.

2.1 Review of Published Information

Published information utilized in conducting this environmental assessment include:

- Street Map published by Microsoft Corporation, Expedia, Streets 98;
- Roselle, New Jersey, 7.5-minute topographic quadrangle, published in 2000 printed at a scale of 1:24000 by the National Geographic Holdings, Inc. The topographic map was viewed on the Topo Scout on CD-ROM;
- Deed records for the subject site dating back to 1962, 1965 and 1974 at the Union County Courthouse Recorder of Deeds in Elizabeth, New Jersey;
- Aerial photographs of the Cranford area taken from 1954, 1970, 1976, 1984 and 1995, and printed at a scale of 1 inch = 750 feet (1954 and 1970), 1 inch = 1,000 feet (1976 and 1984) and 1 inch = 833 feet (1995). The aerial photographs were provided in the report dated April 22, 2002; by the EDR-Aerial Photography Print Service; and
- EDR Radius Report dated April 19, 2002, which includes sites known to the regulatory agencies to have reported releases and/or exhibit potential for contamination due to the generation or handling of toxic or hazardous materials (copy of report provided in Appendix A).

3.0 SITE DESCRIPTION AND HISTORY

3.1 Site Description

The subject site is located in Cranford Township, Union County, New Jersey on North Avenue East, approximately 0.5 miles west of the Garden State Parkway (Drawing 1). The subject site is situated within a residential area with industrial, commercial and retail properties located within 0.25 miles.

According to Mr. Flannery, prior to being developed by Northside Realty Company in 1984, the property was residential. Mr. Flannery stated that public utilities including electric, water and sewage have been provided to the site since 1984.

3.2 Title Records

A chain-of-title review was conducted by Mid-Atlantic personnel at the Union County Recorder of Deeds office in Elizabeth, New Jersey to determine prior ownership of the subject site. The deeds were reviewed in an attempt to identify past owners that might have had cause to use or dispose of hazardous substances on-site. Deeds were reviewed for the three parcels dating back to 1962, 1965 and 1974.

Based upon review of the deed history, the subject site once consisted of three separate parcels of land. All three properties have been owned by both private individuals and corporations. The subject site is currently owned by Northside Realty Company who acquired the property in March 1985 from Brookside Realty Company. The past corporations who have owned portions of the subject site include, RIJA Realty Company (1966 to 1984), Mark Scott Inc. (1965 to 1966), LIVL Associates (1983 to 1984) and 338 North Avenue East, Inc. (1972 to 1983 and 1974 to 1983). No leases or property use descriptions were recorded in the deeds. Two parcels of the land were owned by the Central Railroad Company of New Jersey. No further references were available for any of the parcels of the property before 1962, 1965 and 1974. Mid-Atlantic was unable to trace the deeds through the Grantee index because the index was not divided by date or Township and numerous records to the Central Railroad Company exist.

3.3 Surrounding Land Use

The subject site is located in a residential neighborhood with industrial and commercial businesses within 0.25 miles of the property. The site is bound to the north by North Avenue East, to the south by the Central Railroad of New Jersey and to the east and west by residential properties.

3.4 Topographic Map

Mid-Atlantic reviewed the Roselle, 7.5-minute topographic quadrangle map, published in 2000 by the Toposcout (Drawing 2). The subject site is fairly level with an approximate elevation of 80 feet above Mean Sea Level (MSL). Based on site topography, the site runoff drains to the south-southwest towards the Rahway River. The Rahway River is approximately 0.5 miles southwest of the subject site at an approximate elevation of 60 feet above MSL. Assuming that the water table generally reflects local topography, groundwater in the shallow aquifer beneath the

subject site would generally flow to the south-southwest towards the Rahway River. However, the direction of groundwater flow cannot be accurately predicted based solely on topographic observations.

3.5 Soil Survey

According to the EDR Geocheck Report, the report states that underlying soils of the subject site consist primarily of the Urban Land Series. The report states that the Urban Land Series soils consist of various materials. The soils do not meet the criteria for hydric soils. Depth to bedrock for this area is typically found to be approximately 10 inches below grade (bg).

3.6 Aerial Photographs

Mid-Atlantic reviewed aerial photographs of the subject site taken from 1954, 1970, 1976, 1984 and 1995 and printed at a scale of 1 inch = 750 feet (1954 and 1970), 1 inch = 1,000 feet, (1976 and 1984) and 1 inch = 833 feet (1995). The aerial photographs were provided in the EDR-Aerial Photography Print Service dated April 22, 2002. It should be noted that due to the quality of the photographs, specific details on the subject and surrounding properties are difficult to detect.

The 1995 photograph depicts a building structure on the subject property similar to today. The area surrounding the subject site appears to be composed of residential, commercial and industrial properties. The railroad to the south of the subject site and the Rahway River to the west of the site are apparent in all photographs

The 1984 photograph reveals buildings on the property which do not appear to reflect the current building structure. Residential properties intermixed with commercial and industrial buildings surround the subject site to the north, south, east and west.

The 1976 photograph depicts the subject site to contain a few buildings, possibly of residential and industrial use. Areas surrounding the subject site generally appear to be similar to previous conditions with slightly less development in every direction.

In the 1970 photograph, it appears that residential buildings are situated along the North Avenue East portion of the property. It appears that industrial buildings are situated along the southern portion of the property bordering the railroad. The area surrounding the subject site remains residential intermixed with commercial and industrial, similar to previous photographs.

The 1954 photograph depicts conditions on the subject site and surrounding properties similar to the 1970 photograph.

Company and Loveland Coal Company. The areas to the north, west and southwest of the site appear to be residential with few industrial or commercial properties directly to the west of the subject site. The exact names or use of these properties cannot be read on the map. Coverage is not provided for the area to the east and south of the subject site. No other features could be identified on the map.

The 1959 map depicts the subject site to be owned or operated by Bronze Beadings Inc., Foundry, and Loveland Coal Co. The area to the north of the site appears to be primarily residential with the exception of a paving company which located on North Avenue East. The Union County Mosquito Commission is located to the west of the subject site. A gas station is located across the railroad tracks to the south of the site. The railroad is located to the south of the subject site and appears to remain unchanged since the 1915 map. No other features could be identified on the map.

4.0 RECORDS REVIEW

Mid-Atlantic performed a review of public records to determine if any regulatory agencies were aware of past or current environmental conditions at the site or in the general vicinity of the subject site.

4.1 Standard Environmental Records Search

A search of available environmental records was conducted by EDR, Inc. and is contained in the EDR Radius Map report dated April 19, 2002 (Appendix A). This report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-00. The records searched in the radius report are limited and include only those sites known to the regulatory agencies at the time of publication. These records identify sites with documented releases or that exhibit potential for contamination due to the generation or handling of toxic or hazardous materials. Mid-Atlantic personnel have not verified the distances outlined in the EDR Report.

It should be noted that an attempt was made to locate unmapped sites identified in the EDR report to be in the vicinity of the subject site. However, Mid-Atlantic makes no representation as to the accuracy of the unmapped sites or potential environmental concerns associated with them. This section provides the "reasonably ascertainable" information obtained from our historical information search on the subject site.

4.1.1 Target Site – Northside Realty Company

The subject site was not identified on any of the database reports.

4.1.2 Resource Conservation and Recovery Act (RCRA) Facilities

The Resource Conservation and Recovery Act Information System (RCRIS) database and the CORRACTS database identify those facilities that are subject to RCRA Corrective Action activity and/or are permitted to store, treat or dispose (TSD) of hazardous waste under RCRA. The EDR report identified one CORRACTS site, seven large-quantity generators (LQG) and four small quantity generators (SQG) within the search distance. Further review of the EDR report revealed that generator violations were reported for the Meton Plastics Inc. on North Avenue, Plymouth Printing Company Inc. located at 450 North Avenue and Faust Rudolph Company located at 542 South Street, all of which are located in Cranford. However, all three sites have achieved compliance. Ironbound Heat Treating Company located on 304 Cox Street was listed as a CORRACTS site. The facility was assigned a low corrective action priority. The EDR report did not identify any violations for the remaining eight facilities.

4.1.3 State Hazardous Waste Sites (SHWS)

The SHWS is a list of sites on the NJDEP priority list identified for investigation, remediation or have been delisted. Twenty-one sites were identified within one mile of the property, eighteen of the sites are topographically upgradient to the subject site and three are topographically downgradient from the subject site. Better Sunoco is listed less than 1/8 of a mile upgradient from the subject site for a spill of antifreeze. However, cleanup of the spill was reported to be completed. Madan Plastics is located at 370 North Avenue East, less than 1/8 of a mile upgradient from the subject site. According to the EDR report, this site contains historical soil contamination of metals and the cleanup is in progress. The sources of contamination at the remaining nineteen sites are not listed and remediation status for these sites is listed as active or pending. However, in order to confirm the extent of possible contamination at these sites and their potential for off-site impact, Mid-Atlantic would need to conduct a NJDEP file review

4.1.4 Leaking Underground Storage Tanks (LUSTs)

The EDR report identified ten LUST sites within the ASTM-specified search distance of the subject site. Four of the LUST sites have been issued No Further Action letters (NFAs). Six of the sites are reported to have active LUST cases. Sunoco at 401 North Avenue East and Greco's Garage at 301 South Avenue East have confirmed soil and groundwater contamination. Remediation is in progress at Greco's Garage. No closure date is listed for either site. Plymouth Printing at 450 North Avenue East, Electrical Insulation Inc. at 530 South Avenue, Bloomingdale School at 200 Bloomingdale Avenue and Cranford Fire Department at 7 Springfield Avenue are awaiting assignment. The report does not state if contamination has impacted soil,

groundwater or both.

4.1.5 Underground Storage Tank (UST) Sites

The EDR report identified nine UST sites within 0.25 miles of the subject site. Three of these sites currently operate USTs. These sites are located less than 0.125 miles topographically upgradient to the site. Cranpark Mobile located at 475 North Avenue East has three 9,685-gallon UST's which store unleaded gasoline and diesel fuel. Sunoco located at 401 North Avenue East contains three 10,000-gallon USTs currently in use. Shell Oil Co. at North Avenue and Elizabeth has three 10,000–gallon USTs which store waste oil and unleaded gasoline.

Plymouth Printing Company located at 450 North Avenue is identified as having two 5,000-gallon and one 2,000-gallon USTs that were abandoned. The report did not identify when the tanks were abandoned and if they will be removed. American Home Products Corp. located on South Avenue and Hale Street has twenty-seven 7,500-gallon tanks that were abandoned in 1976. Two of the tanks have been removed and the remaining twenty-five reportedly will be removed. American Home Products Corp. is also identified as a New Jersey Brownfields site with soil contamination. Mid-Atlantic can not determine if the UST on these sites have leaked or have the potential to leak and adversely impact the subject site.

4.1.6 New Jersey Brownfields

New Jersey Brownfield sites are identified as former or current commercial or industrial sites that are currently vacant and underutilized. These are sites where there is a suspected soil and/or groundwater contamination greater than the cleanup criteria. The EDR report identified American Home Products located at 570 South Avenue East, Cranford, approximately 0.125 miles southeast of the subject site. According to the EDR report, eleven 15,000 gallon USTs have been removed from the site and a release of pesticides and oil has been confirmed.

4.1.7 Unmapped Sites

Twenty-seven unmapped sites were identified on the EDR report. Mid-Atlantic performed a vehicular reconnaissance in an attempt to identify if any of the unmapped sites are located in the surrounding area of the subject site. Mid-Atlantic identified a Sunoco Service Station at the corner of Elizabeth Avenue and North Avenue East approximately 0.10 mile from the subject site. However, since no street address is given for the property, Mid-Atlantic could not confirm that this was the same station. Both Sunoco Stations identified in the EDR report are RCRIS and SQG. Swan Custom Dry Cleaners was identified on North Avenue East approximately 0.5 miles west of the subject site. Swan Cleaners is listed in the

EDR report as having a LUST. Grecos Garage is identified in the EDR report to be located at 30 South Avenue East. Mid-Atlantic was unable to determine if this is the same site. The unmapped Grecos Garage is listed as a SHWS. Mid-Atlantic did not locate any of the remaining twenty-three sites in the near vicinity of the subject site. Mid-Atlantic can not determine if any of these sites could potentially impact the site.

4.2 Additional Environmental Record Sources

4.2.1 Environmental Liens

The EDR Report indicates that the subject site is not subject to a National Priorities List (NPL) lien.

4.2.2 NJDEP File Review

Mid-Atlantic contacted the NJDEP to determine if any facility files exist for the subject site or the former owners/occupants as identified on the Sanborn Maps. As of May 1, 2002, Mid-Atlantic has not received a response from the NJDEP as to whether a file exists for the property or the former owners/occupants. Mid-Atlantic will address the information obtained, if any, during the file review in a separate addendum letter.

4.3 Interviews

4.3.1 Mr. James Flannery, Current Property Owner

Mid-Atlantic interviewed James Flannery of Northside Realty Company and current owner of the property, to determine the past uses of the subject site. Mr. Flannery stated that the building on the subject site was constructed in 1984 or 1985 and prior to construction the subject site was residential. Mr. Flannery stated that the building is heated by natural gas and serviced by public water and sewer.

4.3.2. Cranford Township

Mid-Atlantic conducted telephone interviews with Mr. Steven Wardel of Building Sub-Code Construction and Ms. Karen Dorana of the Fire Chief Office. Ms. Dorana and Mr. Wardel stated that they had no record of an UST being installed or removed at the subject site. However, the township only keeps records dating back to 1990.

Mid-Atlantic contacted the Engineering Department of Cranford Township to verify that public sewer served the property. The township does not maintain records for connection dates to public sewer.

5.1.1 First Floor

The first floor contains 7,767 SF and is occupied by High Focus Centers, Grottoc Associates and Angelo and O'Brien. Each office is connected through the main corridor. A set of restrooms are located in the main corridor. The main entrance to High Focus Centers is located on the northern portion of the building along North Avenue East. Their office consists of several personnel offices, a reception area, restrooms and a small kitchen.

Angello and O'Brien and Grottoc Associates occupy the southern portion of the building. Both office areas consist of personnel offices with the remaining space divided into office cubicles.

5.1.2 Second Floor

The second floor contains 14,705 SF and is occupied by and Dughi and Hewit and Barsinoak. Since Barsinoak was not available, Mid-Atlantic was unable to walk through their offices. The office of Dughi and Hewit consists of personnel offices around the perimeter of the floor with cubicle office spaces and a few enclosed offices in the center of the floor.

5.1.3 Third Floor

The third floor contains 14,705 and is occupied by Moore Stevens and Security Benefits. The layout of the third floor is similar to the second floor.

5.1.4 Roof

The air conditioning units are located on the buildings flat rubber roof. Six of the cooling units are coated with suspect asbestos containing surfacing material. The approximate area of this suspect ACM is 1,000 square feet (SF). The suspect surfacing material appears to be in good condition.

5.2 Exterior Assessment

Landscaped grass and macadam parking surround the building along the eastern, western and southern sides of the subject site. The subject site is bound to the north by North Avenue East. The exterior of the building is concrete. A storm water drain is located along the southeastern portion of the property. No staining or stressed vegetation was observed on the property. No electrical transformers are located on or directly in front of the property.

Situated along the southern portion of the property is the New Jersey Railroad. The property is separated from the railroad by a fence and a small strip of land.

6.0 FINDINGS

Based upon the investigative and evaluative tasks performed by Mid-Atlantic, as described above, the following findings are offered:

6.1 On-site

- Based on the chain-of-title search the three parcels of the subject site have been owned by private individuals and corporations since 1962,1964 and 1975; however, no leases or land use descriptions were recorded in the deeds.

- According to Mr. James Flannery, the current building on the subject site was constructed in 1984 or 1985. Mr. Flannery stated that previously the property was residential.

- Based on the review of the Sanborn Maps, the subject site was developed prior to 1915. The Sanborn Maps show that industrial and commercial companies previously occupied the property.

- Based upon Mid-Atlantic's review of the aerial photographs, it appears that the current three-story office building was constructed after March 1984. Prior to this date the subject site consisted of residential and commercial or industrial properties.

- According to information provided by Mr. Flannery, local utilities, public water and sewer, natural gas and electric have served the current building on the subject site since it was constructed; however, Mid-Atlantic was unable to confirm an exact date/dates when the site was connected.

- The subject site was not identified in the EDR report.

- Mid-Atlantic contacted the NJDEP to determine if any facility file exists for the subject site or former owners/occupants. As of May 1, 2002, Mid-Atlantic has not received a response from the NJDEP. Mid-Atlantic will address the information, if any, following the file review in a separate addendum letter.

- According to representatives from Cranford Township, no USTs were removed or installed at the subject site from 1990 through 2002. There are no records prior to 1990.

- Based upon the age of the building, the building should not contain ACMs; however, Mid-Atlantic personnel identified approximately 75 LF of suspect asbestos containing thermal insulation in the third floor electrical/maintenance room and 1,000 SF of suspect asbestos containing surfacing material on the cooling units on the roof of the building.

6.2 Off-site

- The EDR report identified twelve RCRA facilities, twenty-one SHWS sites, three operating UST sites, six active LUST sites and one New Jersey Brownfield site within the ASTM-specified search distances of the subject site. Twenty-seven unmapped sites were identified in the EDR report. Mid-Atlantic located four of the unmapped sites but was unable to locate the remaining twenty-three. Mid-Atlantic is unable to confirm whether these sites have the potential to impact the subject without further investigation.

As requested in the April 11, 2002 Letter of Engagement Letter from Sovereign Bank, the conclusions and recommendations are provided in a separate cover letter transmitting this report. A copy of the Letter of Engagement is provided in Appendix C.

7.0 QUALIFICATIONS OF THE REPORT

Although these assessments have been a reasonably-thorough attempt to identify the potential sources of contamination for the subject site, there is always the possibility that potential sources of contamination have escaped detection due to the limitations of the assessments, the inaccuracy of governmental records or the presence of undetected and unreported environmental incidents. Mid-Atlantic reserves the right to alter our findings on our review of any information obtained and reviewed after the date of this report.

Mid-Atlantic's professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by reputable environmental consultants practicing in this or similar localities. No other warranty, expressed or implied, is made as to the professional information included in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-00. Search distances are per ASTM standard or custom distances requested by the user.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS 1 degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR's definition of a site with an elevation equal to the target property includes a tolerance of +/- 10 feet. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL ASTM STANDARD

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/14/2001 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

STATE ASTM STANDARD

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Protection & Energy's Site Status Report.

A review of the SHWS list, as provided by EDR, has revealed that there are 21 SHWS sites within approximately 1 mile of the target property.

EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D002	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
D007	CHROMIUM
D008	LEAD
D009	MERCURY
D018	BENZENE

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM STANDARD RECORDS

NPL: National Priority List
Source: EPA
Telephone: N/A
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
Source: EPA
Telephone: 703-413-0223
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/21/01
Date Made Active at EDR: 02/04/02
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/26/01
Elapsed ASTM days: 40
Date of Last EDR Contact: 12/26/01

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Source: EPA
Telephone: 703-413-0223
As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

FEDERAL ASTM SUPPLEMENTAL RECORDS

BRS: Biennial Reporting System
Source: EPA/NTIS
Telephone: 800-424-9346
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/99
Database Release Frequency: Biennially

Date of Last EDR Contact: 03/18/02
Date of Next Scheduled EDR Contact: 06/17/02

CONSENT: Superfund (CERCLA) Consent Decrees
Source: EPA Regional Offices
Telephone: Varies
Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: N/A
Database Release Frequency: Varies

Date of Last EDR Contact: N/A
Date of Next Scheduled EDR Contact: N/A

ROD: Records Of Decision
Source: NTIS
Telephone: 703-416-0223
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 09/30/00
Database Release Frequency: Annually

Date of Last EDR Contact: 01/07/02
Date of Next Scheduled EDR Contact: 04/08/02

DELISTED NPL: National Priority List Deletions
Source: EPA
Telephone: N/A
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/29/02
Database Release Frequency: Quarterly

Date of Last EDR Contact: 02/04/02
Date of Next Scheduled EDR Contact: 05/06/02

FINDS: Facility Index System/Facility Identification Initiative Program Summary Report
Source: EPA
Telephone: N/A
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/29/01
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/07/02
Date of Next Scheduled EDR Contact: 04/08/02

HMIRS: Hazardous Materials Information Reporting System
Source: U.S. Department of Transportation
Telephone: 202-366-4526
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 09/30/01
Database Release Frequency: Annually

Date of Last EDR Contact: 01/21/02
Date of Next Scheduled EDR Contact: 04/22/02

MLTS: Material Licensing Tracking System
Source: Nuclear Regulatory Commission
Telephone: 301-415-7169
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 02/14/02
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/07/02
Date of Next Scheduled EDR Contact: 04/08/02

MINES: Mines Master Index File
Source: Department of Labor, Mine Safety and Health Administration
Telephone: 303-231-5959

Date of Government Version: 12/14/01
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/02/02
Date of Next Scheduled EDR Contact: 04/01/02

NPL LIENS: Federal Superfund Liens
Source: EPA
Telephone: 205-564-4267
Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/91
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 02/26/02
Date of Next Scheduled EDR Contact: 05/27/02

PADS: PCB Activity Database System
Source: EPA
Telephone: 202-260-3936
PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 12/01/01
Database Release Frequency: Annually

Date of Last EDR Contact: 02/12/02
Date of Next Scheduled EDR Contact: 05/13/02

RAATS: RCRA Administrative Action Tracking System
Source: EPA
Telephone: 202-564-4104
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/95
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 03/11/02
Date of Next Scheduled EDR Contact: 06/10/02

TRIS: Toxic Chemical Release Inventory System
Source: EPA
Telephone: 202-260-1531
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/99
Database Release Frequency: Annually

Date of Last EDR Contact: 12/26/01
Date of Next Scheduled EDR Contact: 03/25/02

TSCA: Toxic Substances Control Act
Source: EPA
Telephone: 202-260-5521
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

STATE OF NEW JERSEY ASTM STANDARD RECORDS

SHWS: Known Contaminated Sites in New Jersey
Source: New Jersey Department of Environmental Protection
Telephone: 609-292-8761
The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

EDR PROPRIETARY HISTORICAL DATABASES

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

Disclaimer Provided by Real Property Scan, Inc.

The information contained in this report has predominantly been obtained from publicly available sources produced by entities other than Real Property Scan. While reasonable steps have been taken to insure the accuracy of this report, Real Property Scan does not guarantee the accuracy of this report. Any liability on the part of Real Property Scan is strictly limited to a refund of the amount paid. No claim is made for the actual existence of toxins at any site. This report does not constitute a legal opinion.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines/Electrical Transmission Lines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

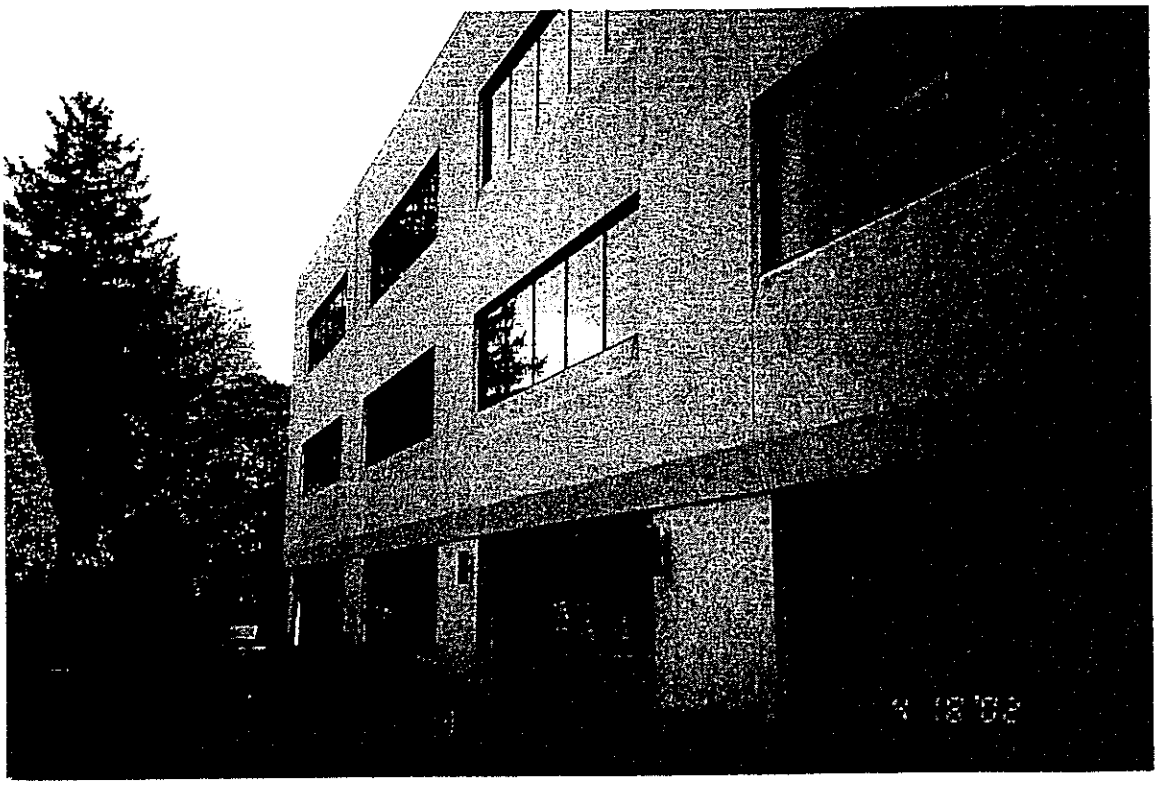
NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 1999 from the U.S. Fish and Wildlife Service.

New Jersey State Wetlands
Source: New Jersey Department of Environmental Protection
This data was obtained by EDR in 1998 from the New Jersey Department of Environmental Protection.

APPENDIX B

PHOTOGRAPHS

List of Photographs for Northside Realty Company, 340 North Avenue East



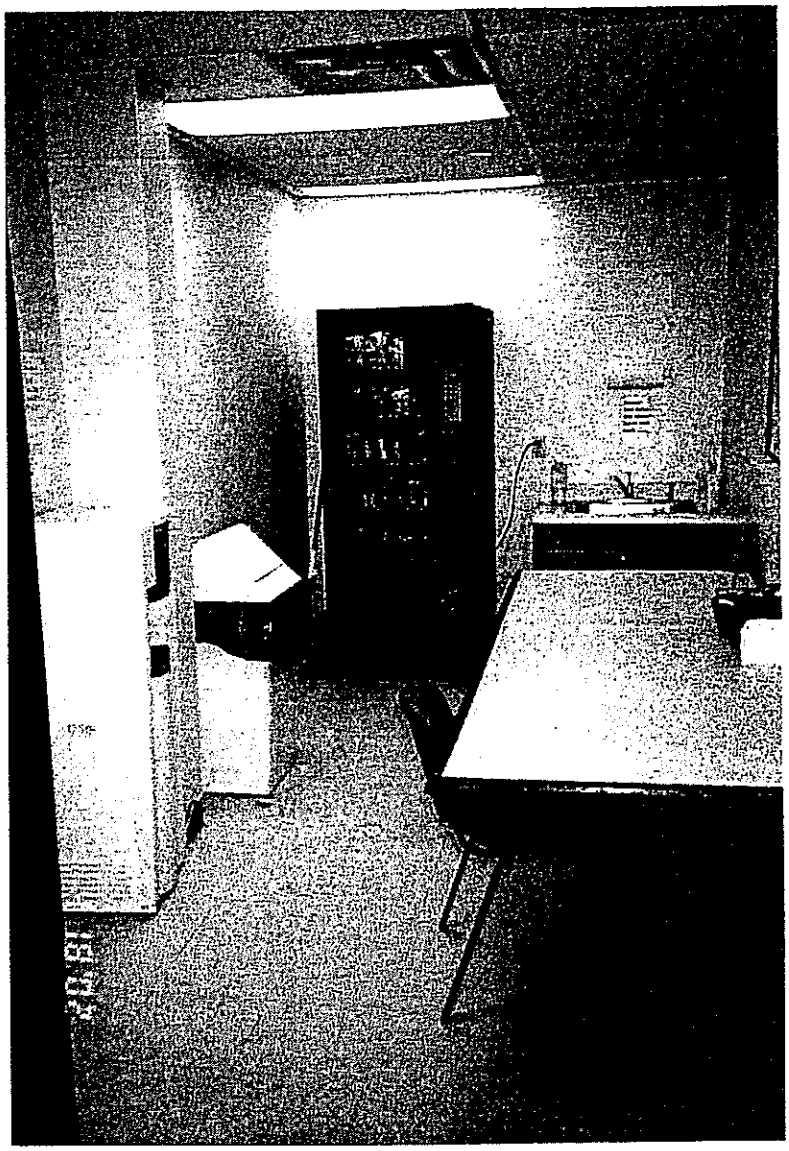
P1: View southeast of Northside Realty's building exterior along North Avenue East. Residential properties are located directly to the east and west of the subject site.

P2: View west of macadam parking lot along southern portion of property. A fence surrounds the property along the east, south and west property boundaries.

List of Photographs for Northside Realty Company, 340 North Avenue East

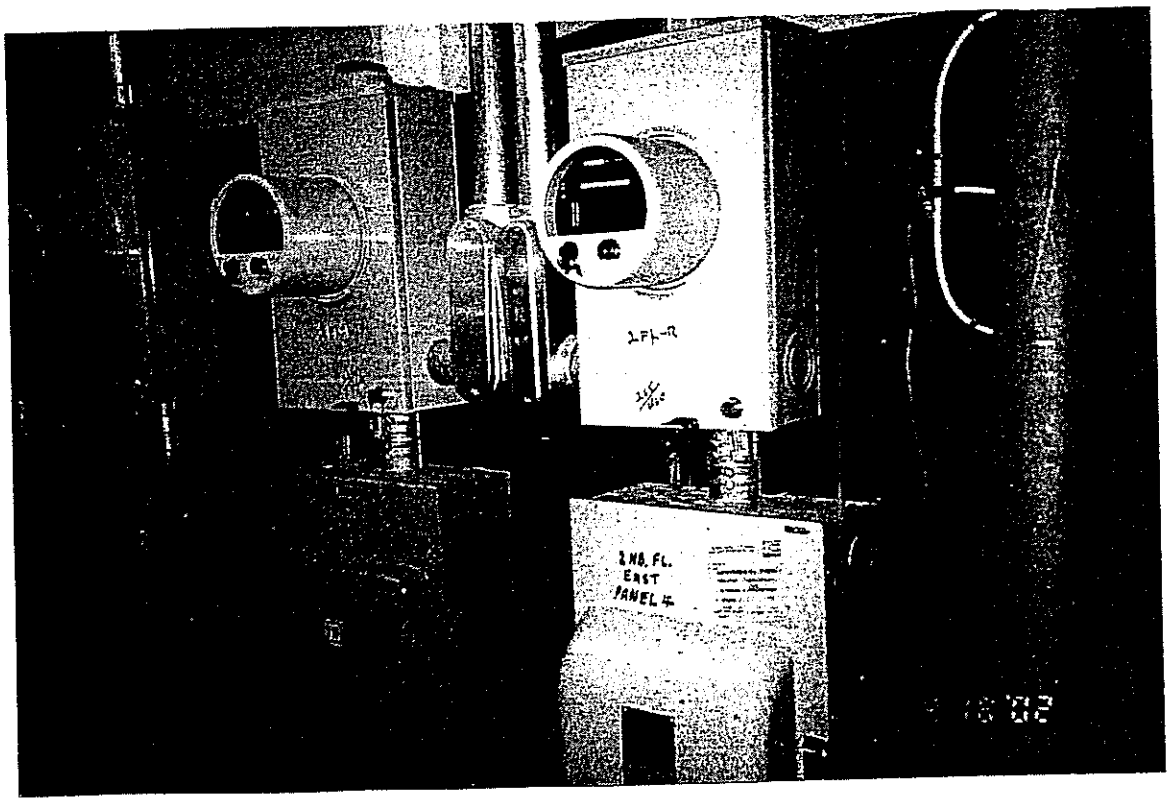
P3: View east of rear parking lot. Central Railroad of New Jersey is located along the southern portion of the property separated from the subject site by a fence.

P4: View of conference room on the first floor. Construction details of the room consist of carpeted floors, painted wallboard, acoustical tile ceilings and florescent lighting. This room is similar to most other rooms in the building.

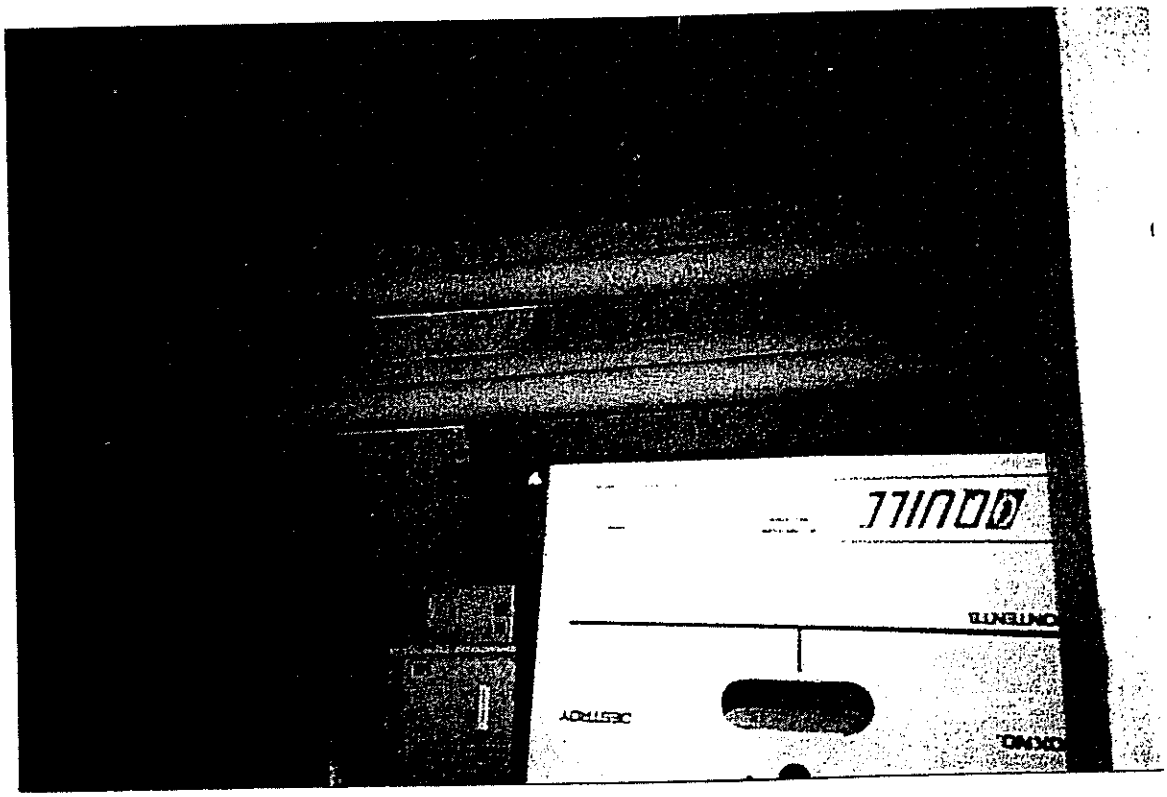


P5: View of kitchen in first floor office. Room is constructed of acoustical tile ceiling, painted wallboard, vinyl tile floor and florescent lighting.

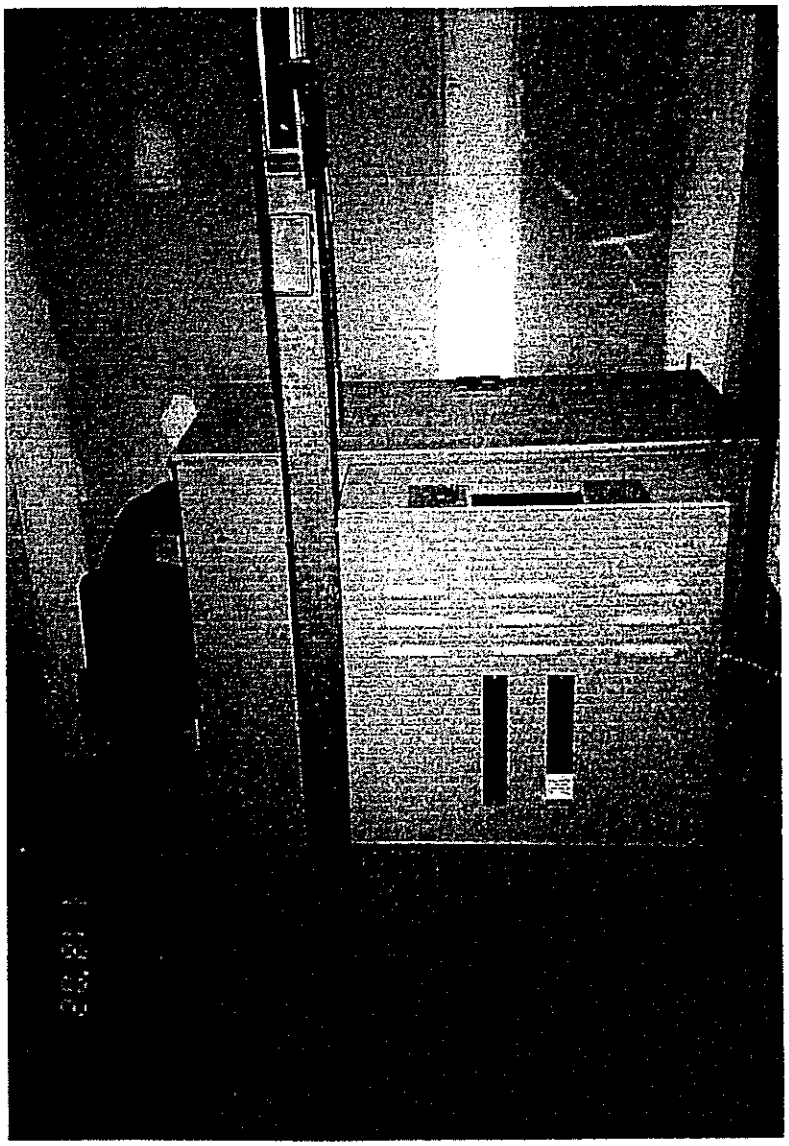
List of Photographs for Northside Realty Company, 340 North Avenue East



P6: View of electrical panel located in the second floor mechanical/maintenance room. This room and its components are similar to the first and third floors.

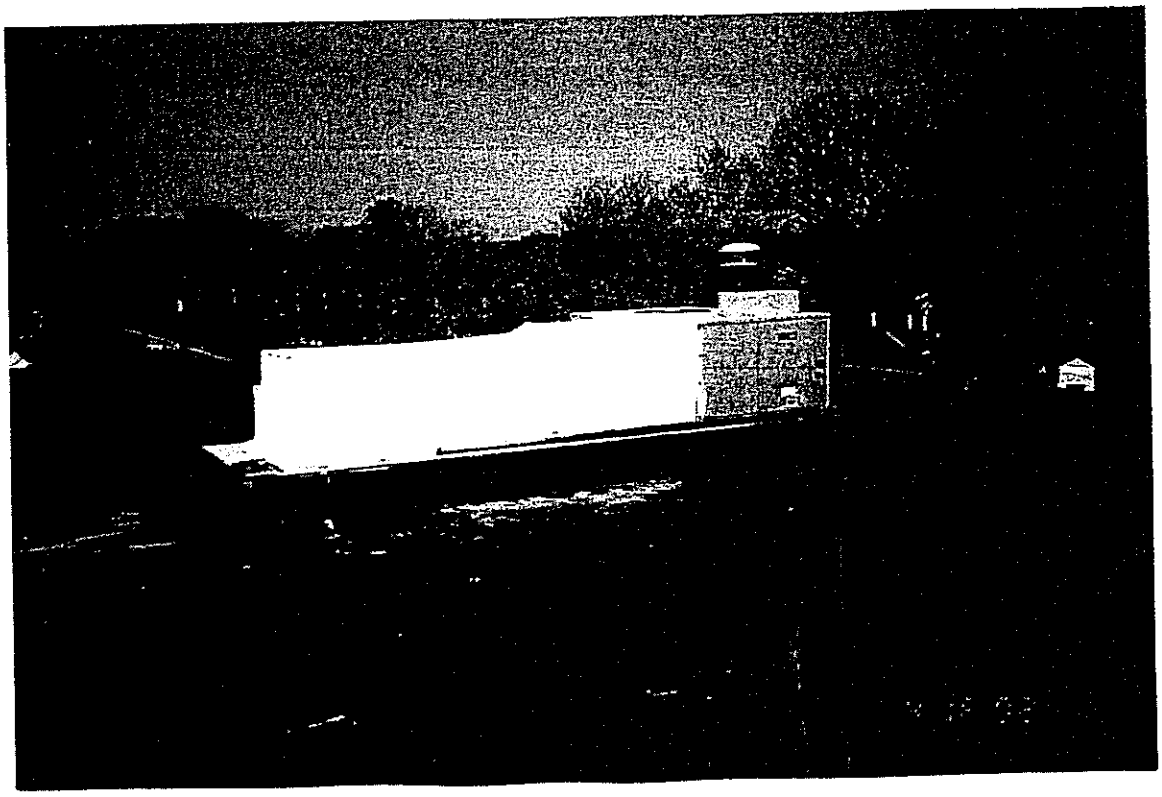


P7: View of suspect asbestos containing thermal insulation located in the third floor electrical/maintenance room. The suspect ACM is approximately 75 LF.

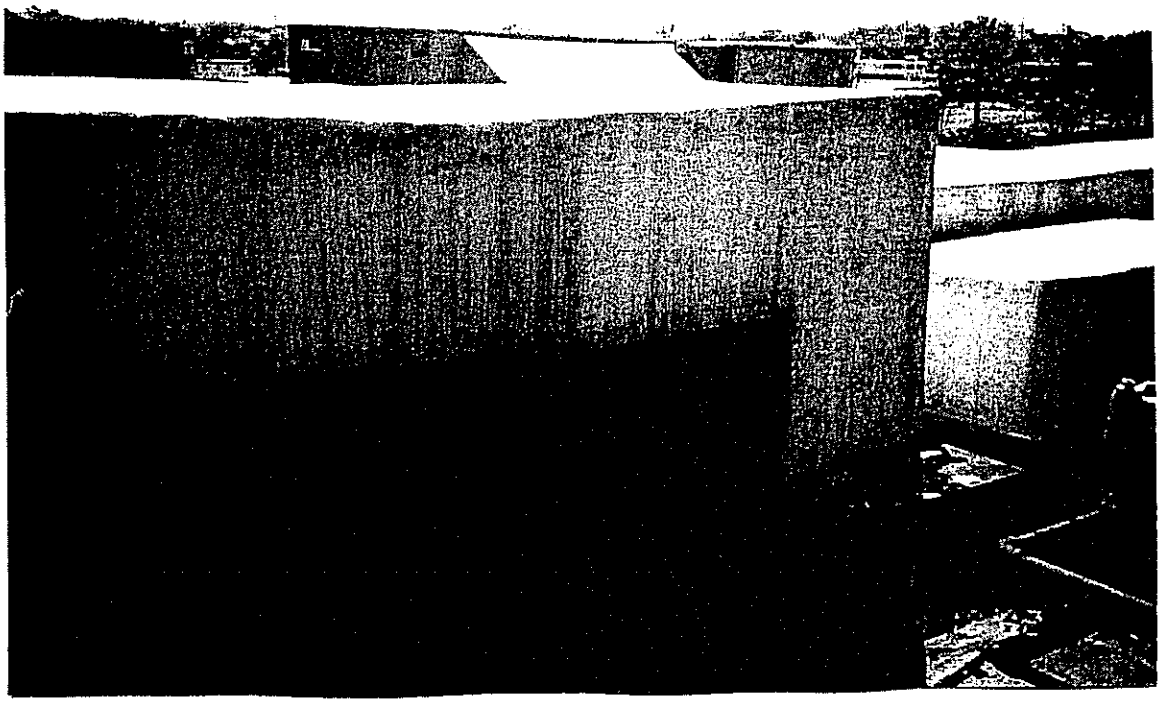


P8: View of elevator system located in the elevator room on the first floor.

List of Photographs for Northside Realty Company, 340 North Avenue East



P9: View north from roof of building. Air conditioning units are located on roof. Mid-Atlantic identified suspect asbestos containing surface material on the cooling units.



P10: Suspect asbestos containing surface material on the cooling units. Six of the units are covered with this material. The approximate area of the suspect ACM is 1,000 SF.

APPENDIX C

EXECUTED LETTER OF ENGAGEMENT

Sovereign

SOVEREIGN BANK NEW ENGLAND

April 11, 2002

Mr. Thomas Gresko
Mid-Atlantic Associates, PA
2951 Advance Lane
Colmar, PA 18915

Project Name: **Northside Realty**
340 North Avenue
Cranford, New Jersey
SBNE Environmental ID: E00939

Dear Thomas:

This letter, if acceptable to you, authorizes Mid-Atlantic Associates (the Environmental Consultant) to conduct an environmental assessment for the property identified herein and to submit a written report to Sovereign Bank New England (SBNE) in accordance with the terms and conditions stated herein. I have enclosed limited general Site information, and I anticipate that the assessment scope of services should include the following activities:

1. Completion of a Phase I Environmental Site Assessment and Report in accordance with ASTM Standard E1527-00, modified to a visual asbestos-containing material (ACM) survey. The limited ACM evaluation should visually identify and describe suspect, friable ACMs associated with Site buildings constructed prior to 1980. This ACM survey should identify the types and condition of the suspect, friable ACMs and estimate the amount/extent of the ACMs.

2. Preparation of a separate report cover letter summarizing: conclusions; recommendations; anticipated further Site investigation, remedial activities, and other actions needed to ensure that the Site complies with state and local regulatory requirements; and, cost and time-frame estimates for anticipated further Site investigation and remedial activities needed to bring the Site to appropriate regulatory closure, if necessary. Special attention should be given to suspect, friable ACM remediation costs, if applicable.

For further particulars, see exhibit attached entitled "Minimum Standards for Environmental Assessments Prepared for Sovereign Bank New England." In accepting this assignment, you affirm that you have the knowledge and experience to complete the assignment competently.

IDENTIFICATION OF THE SUBJECT PROPERTY

The Site is currently occupied by 38,000-square foot office building.

MINIMUM STANDARDS

The enclosed "Minimum Standards," as well as a signed copy of this letter, MUST BE INCLUDED IN EACH COPY OF THE ENVIRONMENTAL ASSESSMENT REPORT. REPORTS NOT CONTAINING THESE ITEMS WILL NOT BE ACCEPTED.

TIME OF PERFORMANCE

The written report (2 copies), shall be delivered to SBNE by Thursday, May 2, 2002 (the DEADLINE).

FEE FOR ENVIRONMENTAL ASSESSMENT SERVICES

SBNE agrees to pay to the environmental consultant a lump sum project fee of $1,600 for the completion of the Phase I Assessment Report, due and payable no more than 45 days after the delivery of the report, provided the complete environmental assessment report is prepared in accordance with terms of this agreement and delivered on or before the DEADLINE. SBNE reserves the right to impose a penalty of 5% of the fee for every week that the delivery of the report is delayed beyond the DEADLINE. This agreement automatically becomes null and void if the environmental assessment report is not received by SBNE within 25 business days of the due date. However, no penalty shall be imposed for any delay that is beyond the control of the environmental consultant, **providing the delay is promptly communicated to the undersigned.**

CONTACT PERSONS AND CORRESPONDENCE

Requests for access to the property and other general Site information required for the environmental assessment should be made to:

SBNE Relationship Manager: Phillip Kolm
Phone: 973-276-7211

The two (2) reports should be submitted to Allison Smaldone and be addressed as follows:

Allison Smaldone
Assistant Vice President
Sovereign Bank New England/ Environmental Risk Unit
75 State Street/Mail Stop: MA1 SST 03-12
Boston, MA 02109

Under no circumstances will the environmental consultant divulge or communicate the environmental assessment findings to anyone including the property owner(s); prospective borrower(s); tenant(s); or anyone other than a representative or Designee of the SBNE Environmental Unit.

All correspondence regarding this assignment and the final environmental assessment report should refer to the PROJECT NAME, PROJECT ADDRESS, and JOB ID as shown below:

PROJECT NAME: NORTHSIDE REALTY COMPANY
PROPERTY ADDRESS: 340 North Avenue, Cranford, New Jersey
ENVIRONMENTAL JOB ID #: E00939

Telephone inquiries relating to this assignment may be directed to Allison Smaldone, SBNE, Telephone 617-757-3405.

Please indicate your agreement with this letter and your understanding of the Minimum Standards for Environmental Assessment Reports Prepared for SBNE which is a part of this agreement, by signing this letter in the space provided, retaining a copy for your files, and returning the original to the person signed below. **If this letter is not signed by you, the environmental consultant, and THE ORIGINAL returned within one week, the agreement stated herein will be cancelled.**

Metuchen, New Jersey 08840

Prepared by

Salem Environmental LLC
203 Main Street
Flemington, NJ 08822
www.salemenv.com

1.0 EXECUTIVE SUMMARY

Salem Environmental LLC (Salem) performed an Environmental Transaction Screen of the property located at 340 North Avenue East, Cranford, Union County, New Jersey (the "Site"). The Site, consisting of an approximately 1.5194-acre lot, is improved with a 3-floor office building and associated parking areas. Based upon review of available historic documentation, the current Site building was constructed circa 1985, prior to which the Site was a combination of residential and commercial since the early 1900s.

The objective of the Transaction Screen was to identify potential environmental concerns ("PECs") in connection with the Site, to the extent feasible pursuant to the processes prescribed in American Society for Testing and Materials (ASTM) International E1528-14 *"Limited Environmental Due Diligence: Transaction Screen Process"* guidelines. The term "PEC" as defined by the ASTM is the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or the material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws.

No evidence of a PEC was observed in connection with the Site. Therefore, no additional action is warranted.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional ("EP") as defined in §312.10 of 40 C.F.R. 312. I, have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

R. Heinze

_____

2.0 SCOPE OF SERVICES

Metuchen Savings Bank ("Client") requested that Salem Environmental LLC ("Salem") conduct a Transaction Screen of the above-referenced property (the "Site"). The objective of the Transaction Screen was to identify potential environmental concerns ("PECs") in connection with the Site, to the extent feasible pursuant to the processes prescribed in American Society for Testing and Materials ("ASTM") International E1528-14 *"Limited Environmental Due Diligence: Transaction Screen Process"* guidelines. The term "PEC" as defined by the ASTM is the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or the material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws.

The Transaction Screen conducted by Salem included, but was not limited to, the following services:

- a reconnaissance-level visit of the Site to look for evidence of the release(s) of hazardous materials and petroleum products and to assess the potential for on-Site releases of hazardous materials and petroleum products
- drive-by observations of adjacent properties and the Site vicinity
- review of limited historical documents (aerial photos)
- Evaluation of the Transaction Screen Questionnaire in Relation to the Site, or questioning of Site Contact relative to the Transaction Screen Questionnaire
- preparation of a letter report presenting our findings, including a summary of conclusions and recommendations

3.0 PHYSICAL SETTING

The Site, consisting of an approximately 1.5194-acre lot, is improved with a 3-floor office building and associated parking areas. The topography at the Site is flat. The Site is located in a densely developed urban commercial and residential area of Cranford, NJ. The Site is identified as Block 317, Lot 19.01. The Site is owned by Northside Realty Co.

A USGS Topographic Map and Google Aerial are provided as Figures 1 & 2, respectively.

Physical Feature	Description
Local & Regional Topography	The Site's topography is flat. According to the USGS Cranford, NJ topographic quadrangle, the Site is located approximately 91 feet above mean sea level.

Surface Water	No surface water was observed on the Site or surrounding properties.
Ground Water	Based on local and regional topography, the groundwater flow is likely to be in an easterly direction.

4.0 SITE VISIT

Salem conducted a reconnaissance of the Site for evidence of PECs. Adam Blades of Salem visited the Site on April 8, 2019. The weather at the time of the investigation was sunny with a temperature of approximately 60 degrees Fahrenheit.

The Site is used for office purposes. No evidence of vent pipes, fill ports, concrete pads or other signs indicative of a heating oil Underground Storage Tank ("UST") was observed. Discarded hazardous materials or petroleum products were not observed. No solid waste dumping was observed. The Site is connected to public utilities. Heating is natural gas and cooling is electric HVAC. No evidence of a PEC was observed on-Site.

Resumes of the Environmental Professional are provided in Appendix A. Photos of the Site visit are provided in Appendix B.

5.0 HISTORIC REVIEW

5.1 LOCAL TAX RECORDS

Local tax records indicate the current Site building was constructed in 1985.

5.2 HISTORIC AERIAL PHOTOGRAPH REVIEW

Salem reviewed historical aerial photograph dated 1931, 1954, 1966, 1970, 1979, 1987, 1995, 2002, 2006, 2007, 2008, 2010, 2012 and 2013 that were available for review on www.historicaerials.com.

The Site is depicted with a structure that appears to resemble the current Site building in the 1987 through 2013 aerials. The Site is depicted with a structure resembling a residence and a commercial structure in the 1931 through 1979 aerials. The surrounding properties are depicted with commercial and residential development in all reviewed years.

5.3 HISTORIC FIRE INSURANCE MAP REVIEW

Salem reviewed a Historic Fire Insurance Map from 1922 for the Site and surrounding properties provided by Princeton University. The Site is depicted with a 2-floor residence fronting to North Avenue and a commercial building labeled "office/sawing/planking supply". Surrounding properties are depicted as residences along North Avenue with a rail-line to the south.

A copy of this Map is provided as Figure 3.

6.0 *E*PROPERTY*FACTS*™ ENVIRONMENTAL RECORD SEARCH

6.1 SALEM ENVIRONMENTAL'S *E*PROPERTY*FACTS*™ METHODOLOGY

Salem searches for environmental records through a proprietary web-application called *ePropertyFacts*™, which Salem developed specifically to improve the thoroughness, speed, reduce due diligence reports' size and increase our proficiency as consultants and advisors, rather than rely on purchasing data from vendors and passing this cost to our clients. *ePropertyFacts*™ reduces Salem's overhead and increases our thoroughness. *ePropertyFacts*™ was designed for Salem to stand apart from other consultants, by saving our clients their ***green.***

ePropertyFacts™ works by conducts a radial scan, using an inputted address, for environmental records within 0.5 or 1.0-mile from the address. This process is accomplished through the use of our proprietary software that utilizes latitudes and longitudes to plot addresses on a maps (known as geocoding), calculates elevation as a higher (+) or lower (-) from the Site, calculates distance of each from the Site, lists each environmental record (the program under which it is regulated) per address and whether it is a Federal or State environmental regulatory program.

With *ePropertyFacts*™, the search takes typically less than 10 minutes, though in dense urban areas a search may take longer. In such areas, at the Environmental Professional's discretion, the search radius may be reduced from 1.0-mile to 0.5-mile. Each Site varies though it will be clearly indicated in the below sections the radial distance.

After scanning millions of records, *ePropertyFacts*™ displays a scalable map with the Site represented as a purple marker and all the properties with environmental records as red balloons. The boundary of the search radius is shown as a red circle. Salem can then easily and quickly zoom to a closer view, eliminate records that are not of concern, and focus on records found for the Site, on adjoining properties, on nearby properties, or at a hydraulically up-gradient (meaning groundwater flows from these properties towards the Site) positions.

While both Federal and State records are checked, Salem will cross-reference State records with each State database. For instance, an environmental record shown in *ePropertyFacts*™ may have identified an adjoining property with this record: "**NJEMS-270887 STATE CLEANUP SITE**". Salem knows this nomenclature and understands that this is a Case Number regulated under NJDEP's Site Remediation Program. Salem can quickly cross-reference NJDEP's Data Miner website using the numeric code and within seconds have a "regulatory status" of the Case. Additional information includes dates of closure, reasons for the existence of the Case, contact information, and the bulk of data Salem needs to quickly assess to remove or include this Case as an environmental liability. Any data obtained from State Databases are copied into the sections below, with *ePropertyFacts*™ data displayed above it. Important information with each record is bold-faced in red. A conclusion paragraph summarizes why the listing is not a liability to the Site, or refers it as a potential environmental liability to Section 7.2 and 8.0 of this report for further discussion and rationale.

ePropertyFacts™ searches the required environmental records and associated distances as listed in *ASTM International's 1527-05E "Standard & Practices for Phase I Environmental Site"*. *ePropertyFacts*™ searches include environmental records (e.g. air permits, land and use permits, refuse disposal, and others) not listed in ASTM's standard as a requirement. Salem has found these additional records useful in identifying RECs that may have otherwise been missed.

The below sections provide a summary of the *ePropertyFacts*™ Environmental Records Search, the full print-out of which is provided in Appendix D.

6.1.1 *ePropertyFacts*™ Site Summary

Address Scanned:	340 North Avenue East, Cranford, NJ
Radius Distance Searched:	0.5-Mile
EP's Rational for Reducing Radius:	Due to heavy urban development, the search radius was reduced to 0.5-Mile.
Environmental Records Confirmed with Site:	No
Environmental Records Confirmed on Adjoining Properties:	Yes (see below)
Other Environmental Records that would be considered RECs:	No

A summary table of total environmental records found by regulatory program through Salem's *ePropertyFacts*™ Search is presented below. The below table summarizes only the total of records per regulatory program. The Site's full *ePropertyFacts*™ Environmental Record Search is included as **Appendix D**, with an overview map, the below summary table, and a listing of addresses in descending order according to their proximity to the Site.

Records found within the search radius that are not considered material threats by the EP are not discussed by address or regulatory program. Through *ePropertyFacts*™ methodology, the EP has concluded that environmental records not listed in Sections 6.1.3 – 6.1.5 below do not pose the potential of a material threat to the Site. Therefore, they would not be considered RECs.

The EP's forms this opinion based on review of *ePropertyFacts*™ mapping, cross-referencing State databases, and through professional judgment and experience. Generally, the EP applies the following reason(s) to form the opinion that these records do not pose the potential of a material threat to the Site, generally utilizing the order of assessment in descending order from these bullets:

- Are hydraulically down-gradient
- Are cross-gradient more than 500 feet from the Site in urban areas
- Are cross-gradient more than 1,250 feet from the Site in suburban areas
- Are cross-gradient more than 2,500 feet from the Site in rural areas
- Have achieved regulatory compliance at the State or Federal Level, such as closure, No Further Action, or Remedial Investigation Completed
- Are permits with no violations or an uncorrected violation
- Are permits for land-use, permits for air discharges, drinking water permits, school permits, or similar type records
- EP's professional experience & judgment

This record pertains to an NJDEP Site Remediation Case that was issued a No Further Action by the NJDEP or an Response Action Outcome by a LSRP. Accordingly, it would not be considered a material threat and no additional action is warranted for this Case.

This record also pertains to a Hazardous Waste Generator Permit on a nearby property. The Permit is listed as active with no violations. It does not constitute a spill, release, discharge or polluting event from the permitted facility. Accordingly, no additional action is warranted.

This record also pertains to an Air Discharge Permit on a nearby property. The Air Discharge Permit is listed as inactive with no violations. Its existence does not constitute a spill, release, discharge or polluting event to the ground, sub-surface or groundwater at or around the permitted facility. Accordingly, no additional action is warranted.

This record pertains to an NJDEP Site Remediation Case that was issued a No Further Action by the NJDEP or an Response Action Outcome by a LSRP. Accordingly, it would not be considered a material threat and no additional action is warranted for this Case.

6.1.5 INCOMPLETE ENVIRONMENTAL RECORDS

Some environmental records are not inputted with adequate location information by government agencies to provide an exact location. These properties are included within the search radius to the extent the existing record allows for mapping within the entered radius. Salem reviewed these records and associated properties as part of Sections above.

A copy of Salem's *ePropertyFacts*™ Environmental Record Search for the Site is included in Appendix D.

7.0 CONCLUSIONS & RECOMMENDATIONS

No evidence of a PEC was observed in connection with the Site. Therefore, no additional action is warranted.

Robert Heinze

Principal

Education

- BS Biology, Seton Hall University (South Orange, NJ), Cum Laude 1999-2003
- All Appropriate Inquires Short Course, National Brownfield's Association
- NJDEP Unregulated Heating Oil Storage Tank ½ day course
- "Environmental Professional" as defined in 40 CFR 312 "All Appropri-

Publications

- "New Jersey Property Owners Association, October 2007 Newsletter, "Knowing Where the Lead-Paint Isn't: the Key to the NJDCA Regulation"
- New Jersey Apartment Associations (NJAA) "How Does the Site Remediation Reform Act Effect Environmental Due Diligence in NJ?" - February, 2011

Current Position

2008-Present Salem Environmental LLC

Mr. Heinze has completed more than 3,000 Phase I Environmental Site Assessments and similar due diligence services for a large variety of multi-family, commercial and industrial properties. He is well-versed on ASTM, NJDEP, NYSDEC, PADEP and EPA regulations relating to real estate transactions and environmental risk assessment.

Prior to started his own firm, Mr. Heinze worked at a large, national environmental engineering firms, where he completed due diligence projects, managed a client portfolio, and monitored regulatory changes.

Past Experience

2007–2008 LFR, Inc./Arcadis

· Managed & Developed Client Portfolio Separate from Large Firm's Clients.
· Performed Phase I & II ESAs on residential, commercial, and industrial properties.
· Performed Preliminary Assessments on child-care facilities.
· Performed Asbestos surveys, Lead-Based Paint Inspections and Risk Assessments.
· Reviewed, Oversaw & Developed Remediation Plans for various NJDEP regulatory programs.

2005–2007 Converse Consultants

· Performed Phase I & II ESAs on residential, commercial, and industrial properties.
· Performed Asbestos surveys, Lead-Based Paint Inspections and Risk Assessments.
· Laboratory tech for large field event utilizing TRIAD approach to PCB delineation.

2003-2005 LEW Corporation

· Performed Phase I & II ESAs on residential, commercial, and industrial properties.
· Performed Asbestos surveys, Lead-Based Paint Inspections and Risk Assessments.

Adam Blades

Project Manager

Education & Training

BS Environmental Science, Ramapo College (Ramapo, NJ), 2007—2011

OSHA 40-Hour HAZWOPER Certification

ASTM International 3-Day Course "Phase I & II Environmental Site Assessment for Commercial Real Estate" completed October, 2017

Current Position

2015-Present Salem Environmental LLC

Mr. Blades completes Phase I Environmental Site Assessments, Transaction Screens, Phase II Environmental Site Assessments as part of client due diligence work. Mr. Blades is well-versed on ASTM and EPA regulations relating to real estate transactions and environmental risk assessment.

Mr. Blades is responsible for property inspections, field reporting, scheduling and providing support to office staff.

Past Experience

2015-2016 Field Technician at Environmental Logic LLC

-Soil and Groundwater Sampling
-Air monitoring and vapor intrusion investigations
-Soil Vapor Extraction (SVE) System maintenance
-Lab Data interpretation and report preparation
-NJDEP document preparation
-Training of interns and new employees on sampling procedures

2013-2015 Senior Field Technician at In-Situ Oxidative Technologies, Inc. (ISOTEC)

-Implement In-Situ Chemical Oxidation (ISCO) plans at remediation sites
-Groundwater sampling in support of ISCO process monitoring
-Technical writing and report preparation

2012-2013 JM Sorge, Inc.

-Soil and groundwater sampling
-Monitoring well installations and abandonments
-Conducted Preliminary Assessments/ Site Investigations
-Air monitoring and remediation oversight of Brownfields redevelopment
-Technical writing and lab data interpretation

APPENDIX H

TERMINOLOGY

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-13. The Standard Practice should be referenced for further detail related definitions or additional explanation regarding the meaning of terms.

Recognized environmental condition (REC): The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

De minimis conditions: Conditions that generally do not present threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized conditions.

Historical recognized environmental condition(s) (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time of the Phase I ESA, the condition shall be included in the conclusions section of the report as a recognized environmental condition,

Controlled recognized environmental condition(s) (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report. NOTE: A condition identified as a controlled recognized environmental condition does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Material threat: A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank that contains a hazardous substance and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Material impact to public health or environment: A substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. An example might include a release of a hazardous substance in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or substantial damage to natural resources. The risk of that exposure or damage would represent a material impact to public health or environment.

General risk of enforcement action: The likelihood that an environmental condition would be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be more likely than not, then the condition is considered a general risk of enforcement action.

Data failure: A failure to achieve the historical research objectives, even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Data gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

Hey Alissa,

Can you run SS-1 and SS-2 for only EPH Cat. 2, for now?

Thank you,
Justina

All ok,

For the VOC and EPH last day of hold is 7/10 and the metals you are good for 6 months, and 28 days for HG

Duh! I have the chain on my desk. Just saw it when i walked in. The samples are on complete hold correct?

Extractable Petroleum Hydrocarbons:

Gas Chromatography/Flame Ionization Detector

New Jersey Department of Environmental Protection Site Remediation Program Extractable Petroleum Hydrocarbons Methodology (Version 3.0).
USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods Update III, Method 8015B or NJDEP Office of Quality Assurance Quantitation of Semi-Volatile Petroleum Products in Water, Soil and Sediment OQA-QAM-025, Revision 6.

Metals:

Inductively-Coupled Plasma Atomic Emission Spectrometry or Inductively-Coupled Plasma Mass Spectroscopy

Wastewater and Groundwater Samples: USEPA Methods for the Analysis of Water and Wastes, Method 200.7, Method 200.8.
Soil Samples: USEPA Methods for Evaluating Solid Waste Physical/Chemical Methods Update III, Method 6010D.

Mercury:

Cold Vapor Atomic Absorption Spectrometry

Wastewater and Groundwater Samples: USEPA Methods for the Analysis of Water and Wastes, Method 245.1.
Soil Samples: USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods Update III, Method 7471B.

Volatile Organic Compounds:

Purge and Trap Gas Chromatography/Mass Spectroscopy

Drinking Water Samples: USEPA Methods for the Determination of Organic Compounds in Drinking Water, Method 524.2.
Wastewater Samples: USEPA Methods for the Analysis of Water and Wastes, Method 624.1, Method 8260C.
Soil and Groundwater Samples: USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods Update III, Method 8260C.

Semi-Volatile Organic Compounds:

Gas Chromatography/Mass Spectroscopy

Wastewater Samples: USEPA Methods for the Analysis of Water and Wastes, Method 625.1, Method 8270D.
Soil and Groundwater Samples: USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods Update III, Method 8270D.

Pesticides:

Gas Chromatography/Electron Capture Detector

Wastewater Samples: USEPA Methods for the Analysis of Water and Wastes, Method 608.3, Method 8081B.
Soil and Groundwater Samples: USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods Update III, Method 8081B.

Polychlorinated Biphenyls (PCBs):

Gas Chromatography/Electron Capture Detector

Wastewater Samples: USEPA Methods for the Analysis of Water and Wastes, Method 608.3, Method 8082A.
Soil and Groundwater Samples: USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods Update III, Method 8082A.

General Chemistry Methods:

Various general chemistry methods are taken from "Standard Methods for the Examination of Water and Wastewater, 19th Edition"*.*

Specific method citations can be found on the Analytical Results Summary page of this report listed under 'Method'.

** A complete list of APL's certified Methods are accessible on the Standards And Docs page of the Results Retrieval System

MDL:

Method Detection Limit. The minimum reportable concentration of a substance that can be measured and reported with 99% confidence that the analyte concentration is greater than zero. The value is calculated from the analysis of seven replicates of a spike sample. On analytical reports this value is corrected for percent moisture and any concentration or dilution factors.

RL:

Reporting Limit. The Concentration of the lowest calibration standard that was included in the initial calibration of the instrument. On analytical reports this value is corrected for percent moisture and any concentration or dilution factors.

Concentration (Conc) / Result:

If the compound is detected, the measured concentration is reported. If this column is left blank, or contains a 'less than' (<) symbol, the compound was not detected.

Tentatively Identified Compound (TIC):

A TIC is a non-targeted compound, not included in the calibration, identified by a mass spectral library search.

Qualifiers:

- **U:** Indicates the compound was analyzed for but was not detected.
- **J:** Indicates an estimated value. All tentatively identified compounds (TICs) and results below the RL receive this qualifier.
- **B:** Indicates the analyte was found in the method blank as well as the sample.
- **N:** Used when reporting a specific tentatively identified compound.
- **E:** Indicates that the concentration of the compound exceeds the calibration range of the instrument. The results of a diluted analysis will also be reported. The results of the dilution should be used for those compounds exceeding the calibration range in the undiluted analysis.

DATA OF KNOWN QUALITY CONFORMANCE/NON-CONFORMANCE SUMMARY QUESTIONNAIRE

Laboratory Name: Aqua Pro-Tech Laboratories

Client: Peak Environmental

Project Location: NORTH AVE EAST

Project Number: 9061146

Laboratory Sample ID(s): 01-02

Sampling Date(s): June 26,2019

List DKQP Methods Used: NJDEP-EPH-CAT2;Gravimetric

1	For each analytical method referenced in this laboratory report package, were all specified QA/QC performance criteria followed, including the requirement to explain any criteria falling outside of acceptable guidelines, as specified in the NJDEP Data of Known Quality performance standards?	☑ Yes ☐ No
1A	Were the method specified handling, preservation, and holding time requirements met?	☑ Yes ☐ No
1B	EPH Method: Was the EPH method conducted without significant modifications (see Section 11.3 of respective DKQ methods)	☑ Yes ☐ No ☐ N/A
2	Were all samples received by the laboratory in a condition consistent with that described on the associated chain-of-custody document(s)?	☑ Yes ☐ No
3	Were samples received at an appropriate temperature (4±2° C)?	☑ Yes ☐ No ☐ N/A
4	Were all QA/QC performance criteria specified in the NJDEP DKQP standards achieved?	☑ Yes ☐ No
5	Were reporting limits specified or referenced on the chain-of-custody or communicated to the laboratory prior to sample receipt? Were these reporting limits met?	☑ Yes ☐ No ☑ Yes ☐ No ☐ N/A
6	For each analytical method referenced in this laboratory report package, were results reported for all constituents identified in the method-specific analyte lists presented in the DKQP documents and/or site-specific QAPP?	☑ Yes ☐ No
7	Are project-specific matrix spikes and/or laboratory duplicates included in this data set?	☐ Yes ☑ No

Notes: For all questions to which the response was "No° (with the exception of question #7), additional information should be provided in an attached narrative. If the answer to question #1, #1A, or #1B is "No", the data package does not meet the requirements for Data of Known Quality.°

Positive Results Only Summary

No positive results found

ND - Indicates compound analyzed for but not detected
J - Indicates estimated value
B - Indicates compound found in associated blank
E - Concentration exceeds highest calibration standard

D - Indicates result is based on a dilution
H - Indicates a Hold Time violation
P - Greater than 25% diff. between 2 GC columns.
MDL - Minimum detection limit, **RL** - Reporting limit

ANALYSIS DATA SHEET

General Chemistry

Client: Peak Environmental
Project: NORTH AVE EAST
Work Order: 9061146

General Chemistry

9061146-01 (Soil) - SS-2

Analyte	Units	Conc.	RL	DF	Q	Analyzed	Method
Percent Solids	%	85.2		1		06/28/19 11:30	Gravimetric

9061146-02 (Soil) - SS-1

Analyte	Units	Conc.	RL	DF	Q	Analyzed	Method
Percent Solids	%	79.3		1		06/28/19 11:30	Gravimetric

ND - Indicates compound analyzed for but not detected
J - Indicates estimated value
B - Indicates compound found in associated blank
E - Concentration exceeds highest calibration standard

D - Indicates result is based on a dilution
H - Indicates a Hold Time violation
P - Greater than 25% diff. between 2 GC columns.
MDL - Minimum detection limit, **RL** - Reporting limit
