- GENERAL NOTES:
- Do Not scale drawings.
 - Mechanical and Fire Protection layouts are to be provided by the Contractor responsible for the work. All work to be done in accordance with the Massachusetts State Building Code and all other applicable Codes.
 - The Architect shall not make on site inspections to check the quality or quantity of the work. The Architect shall not have control or charge of and shall not be responsible for construction means, methods, techniques, sequences, or procedures, or for safety precautions and programs in connection with the work, since these are solely the Contractor's responsibility. The Architect shall not have control over or charge acts or omissions of the Contractor, Sub-contractors, or their agents or employees, or of any other persons performing portions of the Work.
 - Contractor shall notify the Architect in writing of discrepancies found on the drawings or in the specifications.
 - All work performed under and in connection with these Contract Documents shall be in strict compliance with the latest O.S.H.A. safety and health standards.
 - Inspections of the Conditions: The installer of each component shall inspect the substrate and conditions under which work is performed. Do not proceed until unsatisfactory conditions have been corrected.
 - Manufacturers Instructions: Comply with Manufacturers Instructions and recommendations to the extent that they are more stringent than the requirements in the Contract Documents.
 - Inspect material immediately upon delivery and again prior to installation. Reject damaged and defective items.
 - Provide attachment and connection devices and methods necessary for securing each construction element. Secure each construction element true to line and level. Allow for expansion and building movement.
 - Recheck measurements and dimensions before starting installation.
 - Mounting Heights: Where mounting heights are not indicated, install components at standard heights for the application indicated.
 - Cleaning and Protection: During handling and installation, clean and protect construction in progress and adjoining materials in place. Apply protective coatings where required to ensure protection from damage or deterioration at substantial completion. Clean and maintain completed construction as often as necessary through the construction period. Adjust and lubricate operable components to ensure operability without damaging effects.
 - Limiting Exposures: Supervise operations to ensure that no part of the construction completed or in progress is subject to harmful or deleterious exposure.
 - Maintain the existing building in a weather tight condition throughout construction. Repair all damage caused by construction operations. Take Precautions Necessary to protect the Building, the Occupants, and the Occupant's belongings during the construction.
 - All demolished materials, except as otherwise noted, shall be removed from the site in accordance with all applicable laws.
