In addition, *Politeness in State Use* may require regulatory provisions of local interest to govern public involvement during a three-dimensional ground-based design.

TRACT-A

CONCLUSIONS: *Staphylococcus aureus* is a common cause of skin and soft tissue infections and is being increasingly recognized as a pathogen in the intensive care unit. The use of empirical antibiotic therapy in the ICU is often based on the results of the local antibiogram. The results of the antibiogram are often outdated and do not reflect the current situation in the ICU. Therefore, the use of empirical antibiotic therapy in the ICU should be based on the results of the local antibiogram. The use of empirical antibiotic therapy in the ICU should be based on the results of the local antibiogram. The use of empirical antibiotic therapy in the ICU should be based on the results of the local antibiogram.
