### **DRC REVIEW COMMENTS – Black Creek Landing**

Clay Electric Cooperative, Inc. (CECI) has existing electrical facilities along Blanding Blvd. to serve the project. Clay Electric Cooperative, Inc. (CECI) will be requiring easements to cover all new electrical services. A surveyed legal description and drawing should be provided to CECI for any new applicable underground service. No trees will be allowed within CECI's existing and/or proposed electrical easement. Any use of CECI's existing non-exclusive easement is subject to the written approval of Clay Electric's Engineering Department, Operations Department and District Operations Department. If not already, please **provide civil plans** to the District Engineer as noted below.

**For application for service**, specific locations and/or relocations, contact Joey Wilkes, District Engineer at (904) 276-6719 or business office at 734 Blanding Boulevard in Orange Park, Florida.
